
DRIVERS ED: MODULE 10 QUESTIONS AND ANSWERS WITH SOLUTIONS 2024

The blue car approaches an intersection with a green light, intending to turn right. A large truck ahead of the blue car activates its right turn signal, but moves into the left lane. What should the driver of the blue car do? - ANSWER Slow down and let the truck make its turn— sometimes large trucks need to enter the opposite lane to allow for wider turns.

NO ZONES - ANSWER A truck's blind spots are called NO ZONES. A No Zone is the area around the truck where your car is no longer visible or where you are so close that the truck can't stop or maneuver safely. In both cases, when you are in a No Zone, you are in much greater danger of getting into a collision.

If you are attempting to pass a truck in a level, legal passing zone use the following method: - ANSWER If you are attempting to pass a truck in a level, legal passing zone use the following method:

Check the area around the front and rear of your vehicle. You may move into the next lane if space is available. You can let the truck driver know your intention to pass by flashing the headlights on your car.

Trucks often move much slower on an upgrade. For this reason, it should be easier to pass a truck on an upgrade than it is to pass a car. However, trucks traveling on a downgrade move faster. In this situation, you should increase your speed (at a safe rate) to pass.

Finish the pass as quickly as possible at a safe speed. If the driver flashes the lights of the truck, this is a signal meaning that it's safe to pull back into the lane. It is safe to move back in when you can see the front of the truck in your rearview mirror.

The blue car approaches a highway from an onramp. A large truck is already in the lane the car wishes to merge into. What should the driver of the blue car do? - ANSWER Slow down, allow the truck to pass, then merge into the lane when it's safe to do so.

SAFETY FIRST - ANSWER SAFETY FIRST

Don't follow too closely or tailgate trucks. When you follow behind a truck and you cannot see the truck driver's side view mirrors, the trucker has no way of knowing you are there. Tailgating a truck, or any vehicle, is dangerous because by doing so you take away your own cushion of safety. Where will you go when the vehicle ahead suddenly stops?

Driver Education for Safety in Adverse Driving Conditions Jonathan Skolnik,2008 Under certain adverse driving conditions often times the driver of a vehicle has inadequate training or education and ends up taking wrongful action leading to severe crashes The purpose of this research was to determine the state of the art practices in educating drivers for safety in certain adverse driving conditions and to develop a realistic module of a driver education program addressing that topic In addition the research sought to determine whether any relevant laws and regulations related to driving in the State of Arizona need to be changed in order to properly address safety under adverse driving conditions The study consisted of four main tasks which included a literature review statistical analysis of Arizona crash data a survey of other states regarding their driver education programs and targeted case studies of selected states and other private or semi government agencies involved in driver education curriculum development and implementation It is the recommendation of this report that Arizona continue its on going efforts to convene a driver education task force consisting of both Arizona Department of Education and Motor Vehicle Department representatives with the goal of developing uniform standards for both driver education curriculum and training for driver education instructors to apply to both the public school driver education program and the professional driver training schools In addition because Arizona does not have an existing state level driver education curriculum the state should adopt a complete driver education curriculum as opposed to a module geared towards adverse driving conditions That said should that effort not be possible it is the recommendation of this report that one of the two adverse conditions related modules Montana or Texas Virginia Both of these modules are well

designed and thorough and both would serve Arizona well They are similar in their coverage of adverse driving conditions The choice between the two would come down to Arizona s preference between the NIDB model with which the Montana curriculum is more closely aligned and the ADTSEA model with which the Virginia Texas module is more closely aligned
