

4. The nurse is reviewing a drug label with a drug name written with tall man lettering. Which statement indicates that the nurse has a correct understanding of tall man lettering on a drug label?
- A The tall man lettering means this is a high-alert drug.
  - B The tall man lettering helps to distinguish this drug from other drugs that have similar names.
  - C The tall man lettering means that this drug contains a boxed warning.
  - D The tall man lettering helps to quickly identify that the drug is an injectable drug.

ANS: B

**Feedback**

Tall man lettering highlights a portion of the drug name to help distinguish the name from other similar drug names. It is not used to identify high-alert drugs, highlight a boxed warning, or identify injectable drugs.

5. The following medication orders are found in the patient's MAR:

**Metformin HCl 500 mg PO daily at 0900.**

**Hydrochlorothiazide 25 mg PO every 12 hr at 0900 and 2100.**

**Digoxin .25 mg PO daily at 0900.**

In reading the medication orders for the 0700–1500 shift, the nurse determines that the priority intervention is to:

- A Question the metformin HCl order.
- B Clarify the hydrochlorothiazide order.
- C Clarify the digoxin order.
- D Prepare to administer the 0900 medications.

ANS: C

**Feedback**

The digoxin medication order requires a zero before the decimal fraction (.25). Safe practice recommends using a leading zero before a decimal point when the dose is less than one. The metformin HCl and the hydrochlorothiazide orders are written correctly.

6. In the administration of medications, the nurse is correct to document the administration of medications:
- A 30 minutes before administering to the patient
  - B Immediately before administering to the patient
  - C At the end of the shift
  - D Immediately after administering to the patient

ANS: D

**Feedback**
