modulation

1 ENGINE CONTROL SYSTEM OVERVIEW

The pump draws fuel from the fuel tank
through the filter. The supply pump increases
the pressure to approximately 150 psi (10.3 bar).
Fuel is pumped through the fuel line
supply manifold for distribution through
the head to the fuel injectors.

Pressure is controlled by the pressure
regulator mounted to the rear of

the fuel manifold, after the pressure regulator, excess
fuel is returned to the tank.

In the injector, the fuel pressure is increased to
injector pressure of approximately 21,000 psi (1,448
bar).
