Rather it teaches hackers of all types from software developers to security professionals to hobbyists how to use the most powerful and often obscure features of OS X for wireless networking, WarDriving, software development, penetration testing, scripting, administrative tasks and much more. Analyst reports indicate that OS X sales will double in 2005. OS X Tiger is currently the #1 selling software product on Amazon and the 12 inch PowerBook is the #1 selling laptop. Only book on the market directly appealing to groundswell of hackers migrating to OS X. Each chapter written by hacker most commonly associated with that topic such as Chris Hurley, Roamer, organizer of the World Wide War Drive.
