Complexity Science Peter Belohlavek,2011-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems Complexity Sciences deal with the research of adaptive systems and environments The unicist approach to complexity sciences implies the discovery of the ontological structure of a reality and the objects that integrate it defining the ontological algorithm and then the actions that can be done to influence such reality *Unicist Mechanics* Peter Belohlavek,2008-03 This book provides a framework for unicist

technology users to implement changes in business processes Unicist mechanics is necessary to influence complex ambiguous or uncertain realities and therefore becomes essential for strategic management It describes the natural consequences of human action on a particular environment It is based on the unicist mechanics implicit in the unicist ontology of evolution Unicist mechanics includes two different approaches to the mechanics of evolution a On the one hand the mechanic resulting from the natural evolution of a given reality It is the mechanics driven by evolution laws b On the other hand the mechanic resulting from human influence on reality It is the mechanics driven by influence principles Understanding unicist mechanics makes the use of unicist technologies simple It includes the taxonomy and rules of the unicist ontology that have been researched to be applied to business processes **The Ontogenesis of Knowledge**

Acquisition Peter Belohlavek,2011-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems When we talk about the ontogenesis of knowledge acquisition we mean the natural steps that need to be considered when learning or when a learning process for other is being designed Knowledge can only be acquired when individuals have made a conscious decision to learn something *Development of Consciousness*

Belohlavek,2011-09-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems Unicist Reflection has been developed to deal with complex human adaptive systems such as businesses to develop scenarios diagnoses and strategies to achieve possible results Unicist Reflection requires

having a final picture in mind It requires positive thinkers individuals who see the bottle half full not half empty

Peopleware Peter Belohlavek,2011-09-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems This book provides the necessary information to transform business architectures into operational business models Peopleware is defined by the structure of objects that individuals have in their minds which define the models they use when dealing with hardware and software at work **Unicist Country Scenario**

Building Peter Belohlavek,2011-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems To forecast and then influence the environment Unicist Anthropology has sought to explain the evolution of societies through the interaction of the driving forces and the most deeply hidden regulating concepts Underlying every functional concept there are implicit cultural archetypes which gravitate towards the concept that they represent *Unicist Business Strategy* Peter Belohlavek,2017-08-23 The Unicist Strategy developed by Peter Belohlavek introduced a paradigm shift in strategy building that emulates the intelligence of nature which always has a maximal strategy to grow and a minimum strategy to ensure survival This approach includes the concept that There are no strategies but strategists because strategies begin to exist in the mind of the strategist The discovery that human actions are driven by the concepts people have in their minds changed the approach to develop strategies It requires managing the unicist concepts and fundamentals that underlie businesses because they are the root causes of their functionality and define the possibilities to develop successful strategies This book includes an introduction to the nature of unicist strategies including the development of strategic intelligence the basic laws of Unicist Business Strategy and market confrontation strategies among other concepts Unicist Business Diagnostics Peter Belohlavek,2011-07 These books were written as

consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems The unicist technology for diagnostics approaches problems based on their nature Problems turn complex when results must be achieved and require a high accuracy of the diagnoses prognoses and action plans to solve them Unicist technologies for diagnostics were developed to ensure results *RobotThinking: The Nature of Automation* Peter Belohlavek,2011-09-07 These books were

the natural evolution laws that changed the paradigms in the understanding of human nature Ontogenetic intelligence provides the basic rules to adapt to an environment It sustains the living being s unstable equilibrium When for any reasons the ontogenetic intelligence is inhibited the living being loses its equilibrium and its survival is endangered The unicist ontology of evolution explains and predicts the evolution of living beings their produces and their actions in a unified field ruled by concepts and their natural laws The research of the unicist ontology of evolution did not enter the field of the origin of life or the origin of the universe The purpose of the research was to discover the origin of the rules of evolution to diagnose and influence it The development of this theory started in 1976 and ended in 2003 with the discovery of the origin of fallacies Fallacies have been and remain a major obstacle to overcome for the understanding of institutions countries and individuals The discovery of the unicist laws of evolution opened new frontiers in the field of diagnoses and prognoses of individuals institutions and countries by using logical inference models This theory enables the analysis of and influence upon complex realities Its reliability has been proven in its application during the last three decades
