on the contact lines which have to operate safely under all relevant climatic conditions needing as little maintenance as
possible Particularly extreme demands are made if overhead contact lines are expected to ensure safe power transmission to
electric traction vehicles travelling at speeds over 300 km h The authors have used their world wide experience to provide a
clear and comprehensive description of the configuration mechanical and electrical design installation and operation of
contact lines for electric railways on local and long distance transportation systems The book provides students and those
embarking on a career in this field with a detailed description of the subject including the electromechanical and structural
requirements Railway company professionals and manufacturers of contact line systems will find practical guidance in the
planning and implementation of systems as well as appropriate specifications and the technical data they will need including
