FUNCTION PREVIEW

- The digestive system breaks down ingested food into particles small enough to be absorbed into the blood.
- Metabolism produces cellular energy (ATP) and includes all constructive and degradative cellular activities.

Children are fascinated by the workings of the digestive system: They relish crunching a potato chip, delight in making “mustaches” with milk, and giggle when their stomach “growls.” As adults, we know that a healthy digestive system is essential for good health because it converts food into the raw materials that build and fuel our body’s cells.
