Borromini Anthony Blunt:

Borromini Anthony Blunt, 1979 Borromini is one of the great geniuses of Baroque architecture perhaps the greatest in inventiveness and in use of spatial effects Here is the first book in English to survey the whole work of the master The author former Director of the Courtauld Institute of Art is known internationally for his many works on French and Italian architecture and painting In this lucid and fully illustrated account Anthony Blunt charts Borromini's career and analyzes and assesses his art Mr Blunt tells of Borromini's training relating his style to that of Bernini under whom he worked and to the architecture from which he learned for example Michelangelo's Borromini's patrons allowed him freedom to evolve his own ideas and his originality and imagination in inventing new architectural forms become apparent as the author studies individual commissions His imagination was apparently limitless but his inventions evolved in terms of rigidly controlled geometry It is this combination of revolutionary inventiveness and intellectual control that gives Borromini's work particular appeal in the twentieth century

Historical Dictionary of Francesco Borromini Lilian H. Zirpolo, 2025-07-10 Francesco Borromini was one of the most notable architects of the 17th century and though he fell into disfavor by the end of the following century today he is classified as one of the most innovative architects in history Although Borromini enjoyed a highly successful career he was already subjected to intense criticism during his lifetime Criticism continued well after Borromini's death when the most often used word to assess his work was bizarre Critics begrudged the fact that in their view Borromini ignored the traditional rules of architecture that had been established by the ancients and revived during the Renaissance era They did not recognize that Borromini was indeed an avid student of both ancient and Renaissance architecture and that he often borrowed elements from these two eras but then applied them to his structures in new and inventive ways It was not until art historians began assessing Borromini's architecture in a sober and nonjudgmental manner in the late 19th century that he was finally given his proper place in the history of architecture This book assesses Borromini's individual commissions following the proper scholarly methodology as well as his biographical details artistic development relationship with his protectors and patrons and external circumstances that might have determined his artistic output This book emphasizes the innovations Borromini introduced to the field of architecture and how these influenced later artists
