

The University of the State of New York
REGENTS HIGH SCHOOL EXAMINATION**GEOMETRY****Tuesday, January 23, 2018 — 9:15 a.m. to 12:15 p.m., only**Student Name: MR SIBOLSchool Name: JMAP

The possession or use of any communications device is strictly prohibited when taking this examination. If you have or use any communications device, no matter how briefly, your examination will be invalidated and no score will be calculated for you.

Print your name and the name of your school on the lines above.

A separate answer sheet for **Part I** has been provided to you. Follow the instructions from the proctor for completing the student information on your answer sheet.

This examination has four parts, with a total of 35 questions. You must answer all questions in this examination. Record your answers to the **Part I** multiple-choice questions on the separate answer sheet. Write your answers to the questions in **Parts II, III, and IV** directly in this booklet. All work should be written in pen, except for graphs and drawings, which should be done in pencil. Clearly indicate the necessary steps, including appropriate formula substitutions, diagrams, graphs, charts, etc. Utilize the information provided for each question to determine your answer. Note that diagrams are not necessarily drawn to scale.

The formulas that you may need to answer some questions in this examination are found at the end of the examination. This sheet is perforated so you may remove it from this booklet.

Scrap paper is not permitted for any part of this examination, but you may use the blank spaces in this booklet as scrap paper. A perforated sheet of scrap graph paper is provided at the end of this booklet for any question for which graphing may be helpful but is not required. You may remove this sheet from this booklet. Any work done on this sheet of scrap graph paper will not be scored.

When you have completed the examination, you must sign the statement printed at the end of the answer sheet, indicating that you had no unlawful knowledge of the questions or answers prior to the examination and that you have neither given nor received assistance in answering any of the questions during the examination. Your answer sheet cannot be accepted if you fail to sign this declaration.

Notice...

A graphing calculator, a straightedge (ruler), and a compass must be available for you to use while taking this examination.

DO NOT OPEN THIS EXAMINATION BOOKLET UNTIL THE SIGNAL IS GIVEN.

Proof in Geometry A. I. Fetisov, Ya. S. Dubnov, 2012-06-11 This single volume compilation of 2 books explores the construction of geometric proofs It offers useful criteria for determining correctness and presents examples of faulty proofs that illustrate common errors 1963 editions [Introduction to Proofs in Mathematics](#) James Franklin, Albert Daoud, 1988

Machine Proofs In Geometry: Automated Production Of Readable Proofs For Geometry Theorems Shang-ching Chou, Xiaoshan Gao, Jing-zhong Zhang, 1994-04-06 This book reports recent major advances in automated reasoning in geometry The authors have developed a method and implemented a computer program which for the first time produces short and readable proofs for hundreds of geometry theorems The book begins with chapters introducing the method at an elementary level which are accessible to high school students latter chapters concentrate on the main theme the algorithms and computer implementation of the method This book brings researchers in artificial intelligence computer science and mathematics to a new research frontier of automated geometry reasoning In addition it can be used as a supplementary geometry textbook for students teachers and geometers By presenting a systematic way of proving geometry theorems it makes the learning and teaching of geometry easier and may change the way of geometry education **Logic, Sets and the Techniques of Mathematical Proofs** Brahima Mbodje Ph. D., 2011-06 As its title indicates this book is about logic sets and mathematical proofs It is a careful patient and rigorous introduction for readers with very limited mathematical maturity It teaches the reader not only how to read a mathematical proof but also how to write one To achieve this we carefully lay out all the various proof methods encountered in mathematical discourse give their logical justifications and apply them to the study of topics such as real numbers relations functions sequences fine sets infinite sets countable sets uncountable sets and transfinite numbers whose mastery is important for anyone contemplating advanced studies in mathematics The book is completely self contained since the prerequisites for reading it are only a sound background in high school algebra Though this book is meant to be a companion specifically for senior high school pupils and college undergraduate students it will also be of immense value to anyone interested in acquiring the tools and way of thinking of the mathematician **How to Read and Do Proofs** Daniel Solow, 1990-03-29 This straightforward guide describes the main methods used to prove mathematical theorems Shows how and when to use each technique such as the contrapositive induction and proof by contradiction Each method is illustrated by step by step examples The Second Edition features new chapters on nested quantifiers and proof by cases and the number of exercises has been doubled with answers to odd numbered exercises provided This text will be useful as a supplement in mathematics and logic courses Prerequisite is high school algebra [Introduction to Mathematical Proofs, Second Edition](#) Charles Roberts, 2014-12-17 *Introduction to Mathematical Proofs* helps students develop the necessary skills to write clear correct and concise proofs Unlike similar textbooks this one begins with logic since it is the underlying language of mathematics and the basis of reasoned arguments The text then discusses deductive

mathematical systems and the systems of natural numbers integers rational numbers and real numbers It also covers elementary topics in set theory explores various properties of relations and functions and proves several theorems using induction The final chapters introduce the concept of cardinalities of sets and the concepts and proofs of real analysis and group theory In the appendix the author includes some basic guidelines to follow when writing proofs This new edition includes more than 125 new exercises in sections titled More Challenging Exercises Also numerous examples illustrate in detail how to write proofs and show how to solve problems These examples can serve as models for students to emulate when solving exercises Several biographical sketches and historical comments have been included to enrich and enliven the text Written in a conversational style yet maintaining the proper level of mathematical rigor this accessible book teaches students to reason logically read proofs critically and write valid mathematical proofs It prepares them to succeed in more advanced mathematics courses such as abstract algebra and analysis

Mistakes in Geometric Proofs Яков Семенович
Дубнов, 1963 This booklet Mistakes in Geometric Proofs presents examples of faulty geometric proofs some of which illustrate mistakes in reasoning that a student might make while others are classic sophisms Chapters 1 and 3 present these faulty proofs and then Chapters 2 and 4 give comprehensive analyses of the mistakes A background of high school geometry is presupposed with trigonometry needed for some details
