Characteristics and Motivational Features of a PC-based Game James Belanich, 2004 The purpose of the research was to identify and assess instructional and motivational features of a first person perspective game environment The game used was America's Army a popular PC based game developed by the U S Army to inform recruiting age individuals about the Army Twenty one participants first completed a pre game questionnaire that assessed prior knowledge of information presented in the game after which they played the basic training sections of the game Then participants answered questions

regarding information presented during the game and about motivational aspects of the game Participants recalled procedures better than facts Information relevant to the progression of the game was recalled better than information that was not Graphic images and spoken text were recalled more accurately than printed text Realism challenge exploration and control were factors that influenced motivation The findings of the current research were specific to a single PC based first person perspective game but were in agreement with a broad range of research using other types of games and instructional media 1% SLiR IFflTTPPM %
