

CHAPTER 1

INTRODUCTION: THEMES IN THE STUDY OF LIFE

OUTLINE

- I. Life's Hierarchical Order
 - A. The living world is a hierarchy, with each level of biological structure building on the level below it
 - B. Each level of biological structure has emergent properties
 - C. Cells are an organism's basic units of structure and function
 - D. The continuity of life is based on heritable information in the form of DNA
 - E. Structure and function are correlated at all levels of biological organization
 - F. Organisms are open systems that interact continuously with their environments
 - G. Regulatory mechanisms ensure a dynamic balance in living systems
- II. Evolution, Unity, and Diversity
 - A. Diversity and unity are the dual faces of life on Earth
 - B. Evolution is the core theme of biology
- III. Science as a Process
 - A. Testable hypotheses are the hallmarks of the scientific process
 - B. Science and technology are functions of society
 - C. Biology is a multidisciplinary adventure

OBJECTIVES

After reading this chapter and attending lecture, the student should be able to:

1. Briefly describe unifying themes that pervade the science of biology.
2. Diagram the hierarchy of structural levels in biology.
3. Explain how the properties of life emerge from complex organization.
4. Describe seven emergent properties associated with life.
5. Distinguish between holism and reductionism.
6. Explain how technological breakthroughs contributed to the formulation of the cell theory and our current knowledge of the cell.
7. Distinguish between prokaryotic and eukaryotic cells.
8. Explain, in their own words, what is meant by "form fits function."
9. List the five kingdoms of life and distinguish among them.
10. Briefly describe how Charles Darwin's ideas contributed to the conceptual framework of biology.
11. Outline the scientific method.
12. Distinguish between inductive and deductive reasoning.
13. Explain how science and technology are interdependent.

Second Edition Martha R. Taylor,1990 *Levels of Organization in the Biological Sciences* Daniel S. Brooks,James
DiFrisco,William C. Wimsatt,2021-08-24 Scientific philosophers examine the nature and significance of levels of organization
a core structural principle in the biological sciences This volume examines the idea of levels of organization as a distinct
object of investigation considering its merits as a core organizational principle for the scientific image of the natural world It
approaches levels of organization roughly the idea that the natural world is segregated into part whole relationships of
increasing spatiotemporal scale and complexity in terms of its roles in scientific reasoning as a dynamic open ended idea
capable of performing multiple overlapping functions in distinct empirical settings The contributors scientific philosophers
with longstanding ties to the biological sciences discuss topics including the philosophical and scientific contexts for an
inquiry into levels whether the concept can actually deliver on its organizational promises the role of levels in the
development and evolution of complex systems conditional independence and downward causation and the extension of the
concept into the sociocultural realm Taken together the contributions embrace the diverse usages of the term as aspects of
the big picture of levels of organization Contributors Jan Baedke Robert W Batterman Daniel S Brooks James DiFrisco

Umerez William C Wimsatt James Woodward Opinion formation : A life history study of the factors that influence the
acceptance or rejection of the Big Bang theory and theory of biological evolution among lifelong learners. Dr Ian S. G.
Blagrove,2025-05-23 Abstract This book explores the factors that influence the acceptance or rejection of the Big Bang
theory and the theory of biological evolution The rejection of either theory can occur despite the time that has elapsed since
the original theories were proposed and their wider acceptance The study critically examines the biographies of individuals
establishing the factors that influence their rejection or acceptance of either theory The book concludes that individuals are
affected by multiple factors and explores how these findings may contradict other studies which identify religious belief as
the driver for rejection The author proposes an original theory of opinion formation that is specific to both scientific theories
and suggests the use of inclusive teaching methods and historical narrative within science lessons which may assist in
explaining to students the story of discovery of each scientific theory as well as teaching the theory itself The study also
concludes that the rejection of both theories particularly by older participants may be linked to past discredited theories
including the Steady State theory and the theory of Panspermia *Student Study Guide for Biology [by]*
