## Casa Flight Instructor Manual:

**Multimodal Safety Management and Human Factors** José M. Anca Jr, 2017-05-15 Safety management and human factors disciplines are often regarded as subjective and nebulous. This perhaps stems from a variety of sometimes disparate activities in the realms of education, industry and research. Aviation is one of the safety critical industries that has led the development of safety systems and human factors. However, in recent years, safety management and human factors are seen to be progressing well in the road, rail and the medical arena. Multimodal Safety Management and Human Factors is a wide ranging compendium of contemporary approaches in the aviation, road, rail and medical domains. It brings together 28 chapters from both the academic and professional worlds that focus on applications, tools and strategies in safety management and human factors. It is a wellspring of the practical rather than the theoretical. Safety scientists, human factors industry practitioners, change management advocates, educators and students will find this book extremely relevant and challenging.

*Human Performance in General Aviation* David O'Hare, 2017-03-02 This is the first available edited collection of chapters on human performance in general aviation. Each chapter has been written by someone with knowledge of both the research literature and the operational background of general aviation. Chapters are designed to survey the current state of knowledge in areas critical to general aviation and to spell out both the operational implications of this knowledge and the directions needed for future research. Topics covered include strategies for flight instruction, the development of computer based training, stress and decision making, skill development, the involvement of general aviation pilots in incidents and accidents, human factors implications of GPS use and the future of aircraft design and development in general aviation. The book provides an authoritative outline of currently applicable human factors knowledge for general aviation and a valuable guide to future developments. It features a foreword by Dr Stan Roscoe.
