High Stakes Treason Ian Trottier, 2025-07-28 High Stakes Treason presents verified open source information to show former CIA Director John O Brennan conducted a long term criminal scheme to manipulate intelligence protocols and key counterterrorism CT personnel to increase the value of stock he held illegally to make millions Brennan repeatedly filed or caused to be filed false official statements to hide his illegal ownership of stock in an indispensable government contracting company while maintaining his control over the CT initiatives of the Obama Administration a clear conflict of interest High Stakes Treason uses Brennan's own words to describe in detail how he established sweeping new intelligence protocols for the National Counterterrorism Center NCTC and how these protocols enabled complete control over counterterror activities of the entire US government The book shows specific examples of how Brennan then apparently used a single unwitting NCTC analyst as his personal cutout to implement the new intel protocols and hide specific intelligence

from the FBI and the CIA enabling successful terror attacks against the United States including the Boston Marathon Bombing High Stakes Treason's use of documentation reveals the identity of the NCTC analyst and documents Brennan's apparent efforts to conceal his meetings with this analyst through multiple false entries in the White House Visitor Log It also presents SEC documents which show Brennan was able to increase the value of his stock from 50 000 to 4 850 000 as Congress increased counterterrorism funding after each successful attack on our country

Defense White Paper,

Digital Privacy, Terrorism and Law Enforcement Simon Hale-Ross, 2018-07-06 This book examines the UK's response to terrorist communication. Its principle question asks: has individual privacy and collective security been successfully managed and balanced? The author begins by assessing several technologically based problems facing British law enforcement agencies including use of the Internet, the existence of darknet, untraceable Internet telephone calls and messages, smart encrypted device direct messaging applications and commercially available encryption software. These problems are then related to the traceability and typecasting of potential terrorists, showing that law enforcement agencies are searching for needles in the ever-expanding haystacks. To this end, the book examines the bulk powers of digital surveillance introduced by the Investigatory Powers Act 2016. The book then moves on to assess whether these new powers and the new legislative safeguards introduced are compatible with international human rights standards. The author creates a digital rights criterion from which to challenge the bulk surveillance powers against human rights norms. Lord Carlile of Berriew CBE QC in recommending this book notes this particular legal advancement, commenting that rightly so, the author concludes the UK has fairly balanced individual privacy with collective security. The book further analyses the potential impact on intelligence exchange between the EU and the UK following Brexit. Using the US as a case study, the book shows that UK laws must remain within the ambit of EU law and the Court of Justice of the European Union's CJEU's jurisprudence to maintain the effectiveness of the exchange. It addresses the topics with regard to terrorism and counterterrorism methods and will be of interest to researchers, academics, professionals and students researching counterterrorism and digital electronic communications, international human rights, data protection and international intelligence exchange.

Understanding Insurgent Resilience Andrew Henshaw, 2020-07-30 This book examines terrorist and insurgent organisations and seeks to understand how such groups persist for so long while introducing a new strategic doctrine for countering these organisations. The work discusses whether familial or meritocratic insurgencies are more resilient to counterinsurgency pressures. It argues that it is not the type of organization that determines resilience but rather the efficiency functions of social capital and trust which have different natures and forms within them. It finds that while familial insurgencies can challenge incumbents from the start they weaken over time whereas meritocracies will generally strengthen. The book examines four of the most enduring and lethal insurgent organizations: the Haqqani Network in Afghanistan, Lashkar e Taiba in Pakistan, Jemaah Islamiyah in Indonesia and the Abu Sayyaf in the Philippines. The author breaks down each group into its formative strengths and vulnerabilities and presents a bespoke model of strategic counterintelligence that can be used to manipulate, degrade and destroy each organization.
