Economic Concepts and Applications James Stewart, Rankin K. Stewart J, 2008-06-25 Although completely revised and restructured the central theme of this fourth edition of ECONOMIC CONCEPTS AND APPLICATIONS continues to echo the observation of the great nineteenth century economist Alfred Marshall that Economics is a study of mankind in the ordinary business of life In all aspects of life economic concepts are applied to the process of decision making the course of study chosen by a student the choice of employment of a job seeker the mix of goods purchased by a consumer the crops planted by a farmer the pricing decisions of a producer supplier or retailer a government's decision to raise or lower taxes or a central bank's decision to increase the cost of borrowing Decisions of an economic nature are happening everywhere and at all levels of society Some decisions have little impact on the economy while others can have an enormous global impact This text aims to make this reality clear to the reader KEY MARKET Students studying introductory courses on the New Zealand economy and New Zealand Diploma in Business students of The Economic Environment 520 **Economics** Larry D.
