Surface Modification to Improve Properties of Materials Miran Mozetič, 2019-04-16 This book contains selected contributions on surface modification to improve the properties of solid materials The surface properties are tailored either by functionalization etching or deposition of a thin coating Functionalization is achieved by a brief treatment with non equilibrium gaseous plasma containing suitable radicals that interact chemically with the material surface and thus enable the formation of rather stable functional groups Etching is performed in order to modify the surface morphology The etching parameters are selected in such a way that a rich morphology of the surfaces is achieved spontaneously on the sub micrometer scale without using masks The combination of adequate surface morphology and functionalization of materials leads to superior surface properties which are particularly

beneficial for the desired response upon incubation with biological matter Alternatively the materials are coated with a suitable thin film that is useful in various applications from food to aerospace industries Battery Management System for Future Electric Vehicles Dirk Söffker,Bedatri Moulik,2020-11-09 The future of electric vehicles relies nearly entirely on the design monitoring and control of the vehicle battery and its associated systems Along with an initial optimal design of the cell pack level structure the runtime performance of the battery needs to be continuously monitored and optimized for a safe and reliable operation and prolonged life Improved charging techniques need to be developed to protect and preserve the battery The scope of this Special Issue is to address all the above issues by promoting innovative design concepts modeling and state estimation techniques charging discharging management and hybridization with other storage components **The Electric Journal** ,1919 **Electric Railway Journal** ,1917 *Proceedings of the Institution of Electrical Engineers* Institution of Electrical Engineers,1924 Vols for 1970 79 include an annual special issue called IEE reviews **The Electrical Review** ,1926 **Transit Journal** ,1924 *The Principles of Electric Wave Telegraphy and Telephony* Sir John Ambrose Fleming,1919 *Proceedings of ...
