After Piketty Heather Boushey, J. Bradford DeLong, Marshall Steinbaum, 2017-05-08 Are Thomas Piketty's analyses of inequality on target? Where should researchers go from here in exploring the ideas he pushed to the forefront of global conversation? In *After Piketty*, a cast of economists and other social scientists tackle these questions in dialogue with Piketty in what is sure to be a much debated book in its own right.

Economic Development for Everyone Mark M. Miller, 2017-05-09 How do we create employment, grow businesses and build greater economic resilience in our low income communities? How do we create economic development for everyone everywhere including rural towns, inner city neighborhoods, aging suburbs and regions such as Appalachia, American Indian reservations, the Mexican border and the Mississippi Delta, and not just in elite communities? *Economic Development for Everyone* collects, organizes and reviews much of the current research available on creating economic development in low income communities. Part I offers an overview of the harsh realities facing low income communities in the US today, their many economic and social challenges, debates on whether to try reviving local economies vs relocating residents and current trends in economic development that emphasize high tech industry and high levels of human capital. Part II organizes the sprawling literature of applied economic development research into a practical framework of five dynamic dimensions: empower your residents, begin with basic education, enhance your community, build on existing assets, encourage your entrepreneurs, diversify your economy and sustain your development. This book, assembled and presented in a unified framework, will be invaluable for students and new researchers of economic development in low income communities and will offer new perspectives for established researchers, professional economic developers and planners, and public officials. Development practitioners and community leaders will also find new ideas and opportunities along with a broad view on how the many complex parts of economic development interconnect.

Land Law and the Extractive Industries Victoria R Nalule, 2021-08-26 This book analyses the nexus between land access and the extractive industries in Africa, specifically highlighting the gaps in energy, land and mining laws and the practical solutions needed to settle the increasing number of land disputes in resource rich areas. Access to land is essential for the successful operation of energy and mining projects. However, there are often social, environmental and economic issues associated with acquiring land for these projects. Socially, many people are relocated; economically, local communities are not given adequate compensation; environmentally, pollution negatively impacts on the agricultural and fishing industries relied on by over 80% of the local communities. Against this stark background and drawing from the author's fieldwork research, this book addresses the important question of whether the different land tenure systems coupled with administration and registration procedures are adequate to address the increasing land disputes in oil and mineral rich African countries.
