TARIKA SINGH SIKARWAR, 2025-12-10 Financial data plays a critical role in all business decision making as it provides quantitative information that helps to provide a clear view of the financial health of an organization. This vital information is gathered from traditional sources such as public documents and external data sources which are considered alternatives. It can be historical or current and collected on an ongoing periodic e.g. quarterly, annually or as needed basis e.g. related to a transaction. Investors, lenders, executives, and regulators constantly examine financial information. Nonetheless, among these users, financial information is utilized to assess various performance types, whether from an investment standpoint or in relation to strategic goals.
