*Handbook of Urban Educational Leadership* Muhammad Khalifa, Noelle Witherspoon Arnold, Azadeh F. Osanloo, Cosette M. Grant, 2015-06-01 This authoritative handbook examines the community district and teacher leadership roles that affect urban schools It will serve as a foundation for pedagogical and educational leadership practices that foster social justice equity and advocacy for those who have been traditionally and historically underserved in education The handbook s ten sections cover topics as diverse as curriculum instruction and educational outcomes gender race and class higher education and leadership preparation and support Its twenty nine chapters offer both American and international perspectives

**Focus** Mike Schmoker, 2018-07-16 In this 2nd edition of Focus Elevating the Essentials to Radically Improve Student Learning Mike Schmoker extends and updates the case that our schools could be on the cusp of swift unparalleled improvements But we are stymied by a systemwide failure to simplify and prioritize we have yet to focus our limited time and energy on the most essential widely acknowledged evidence based practices that could have more impact than all other initiatives combined They are simple coherent curricula straightforward traditional literacy practices and lessons built around just a few hugely effective elements of good teaching As Schmoker demonstrates the case for these practices and the need for them has grown prodigiously In every chapter you ll find late breaking discoveries and practical advice on how to

simplify the implementation of new state standards in the subject areas on the hidden pitfalls of our most popular but unproven instructional fads and programs and on simple versatile strategies for building curriculum planning lessons and integrating literacy into every discipline All of these strategies and findings are supported with exciting new evidence from actual schools Their success confirms as Michael Fullan writes that a focus on the best high leverage practices won't only improve student performance they will produce stunningly powerful consequences in our schools Rethinking Disability and Mathematics Rachel Lambert, 2024-04-15 Every child has a right to make sense of math and to use math to make sense of their worlds Despite their gifts students with disabilities are often viewed from a deficit standpoint in mathematics classrooms These students are often conceptualized as needing to be fixed or remediated Rethinking Disability and Mathematics argues that mathematics should be a transformative space for these students a place where they can discover their power and potential and be appreciated for their many strengths Author Rachel Lambert introduces Universal Design for Learning for Math UDL Math a way to design math classrooms that empowers disabled and neurodiverse students to engage in mathematics in ways that lead to meaningful and joyful math learning The book showcases how UDL Math can open up mathematics classrooms so that they provide access to meaningful understanding and an identity as a math learner to a wider range of students Weaved throughout the book are the voices of neurodiverse learners telling their own stories of math learning Through stories of real teachers recognizing the barriers in their own math classrooms and redesigning to increase access the book Reframes students with disabilities from a deficit to an asset perspective paving the way for trusting their mathematical thinking Offers equitable math instruction for all learners including those with disabilities neurodiverse students and or multilingual learners Applies UDL to the math classroom providing practical tips and techniques to support students cognitive affective and strategic development Immerses readers in math classrooms where all students are engaged in meaningful mathematics from special education day classes to inclusive general education classrooms from grades K 8 Integrates research on mathematical learning including critical math content such as developing number sense and place value fluency with math facts and operations and understanding fractions and algebraic thinking Explores critical issues such as writing IEP goals in math This book is designed for all math educators both those trained as general education teachers and those trained as special education teachers The UDL Math approach is adapted to work for all learners because everyone varies in how they perceive the world and in how they approach mathematical problem solving When we rethink mathematics to include multiple ways of being a math learner we make math accessible and engaging for a wider group of learners
