City X Guide Beijing China:

The Development of Eco Cities in China Juke Liu, Weiping Sun, Wenzhen Hu, 2016-10-17 This book presents an in depth study on and summary of the current practice and theories for the construction of eco cities in China in the context of the country's rapid urbanization. It argues that by 2020 60% of China's population will live in cities. And the evolution from green cities to eco cities and subsequently to smart cities is crucial to China's sustainable development. The book presents a feasible and objective quantitative evaluation system for the sustainable and healthy development of eco cities. It summarizes the Chinese experience in building eco cities as the coordinated development of economy, society, resources and environment with the goal being to make cities inclusive, safe, resilient and sustainable. This is essential to achieving a number of the United Nations Sustainable Development Goals. In addition, the book defines the current stage of development Chinese cities have reached in terms of ecological construction and offers guidance on selecting suitable urban ecological construction modes and improvement approaches. It provides a valuable reference source and guidebook for research on and the practice of eco city construction. Accordingly, it will help other countries around the world, especially the developing countries, to benefit from China's successful experience.

Climate-Smart Livestock Production: Strategies for Enhanced Sustainability and Resilience Oyegunle Emmanuel Oke, Victoria Anthony Uyanga, Monsuru Oladimeji Abioja, Fisayo Oretomiloye, 2025-09-08 Climate smart livestock production is essential for enhancing animal welfare, ensuring food security and bolstering resilience against climate change as demand for animal sourced foods grows. This field focuses on identifying sustainable strategies at all production scales from expansive commercial farms to smaller operations. We seek original research and review articles that detail practices and technologies aimed at reducing greenhouse gas emissions, minimizing water pollution, optimizing land use and improving animal welfare in livestock systems. The sector faces significant challenges from climate change including heat stress, water scarcity and heightened disease risks. Adopting climate smart practices such as increasing feed efficiency, streamlining manure management and utilizing renewable energy are pivotal in creating more sustainable livestock systems. These efforts must integrate animal welfare to ensure the sustainability and resilience of these enterprises over the long term.

Urbanization and Urban Governance in China Lin Ye, 2017-11-29 This book explores the process of urbanization and the profound challenges to China's urban governance. Economic productivity continues to rise with increasingly uneven distribution of prosperity and accumulation of wealth. The emergence of individual autonomy, including demands for more freedom and participation in the governing process, has asked for a change of the traditional top down control system. The vertical devolution between the central and local states and horizontal competition among local governments produced an uneasy political dynamics in Chinese cities. Many existing publications analyze the urban transformation in China but few focuses on the governance challenges. It is critical to investigate China's urbanization paying special attention to its challenges to urban governance. This edited volume fills this gap by organizing ten chapters of

distinctive urban development and governance issues **School-Based Curriculum in China** Yunhuo Cui,Hao Lei,Wenye Zhou,2020-12-07 This book first develops a framework to understand the curriculum administration system in China It describes the historical process of localizing school based curricula as well as the significance and positioning of school based curricula and presents in detail cases of how three types of school based curriculum were developed and implemented in Chinese schools The book outlines for the first time best practices in school based curriculum development in China i e how to make a holistic curriculum plan how to design a curriculum and how to develop a course in the context of a school based curriculum By discussing these three aspects it clearly summarizes the strategies and technologies for school based curriculum development which are applicable across contexts Although the concept originated outside China school based curriculum development in China differs from that in other countries both in theory and practice This book equips readers with theoretical and practical knowledge of how to develop school based curricula and how to generate experiences for new curriculum development This timely book is a valuable resource for researchers curriculum designers school teachers and others who are interested in school based curriculum development *Sustainable Cultural Management* Łukasz Wróblewski,Ana Gaio,Ellen Rosewall,2019-12-06 The connections between culture and sustainability have been in the public agenda since the 20th century However whilst global sustainability programmes at international institutional levels are yet to recognise the role of culture in their sustainability policies the bid albeit failed in the early 2000s to formally add culture to the trilogy of sustainability pillars economic social and environmental mobilised a new discourse for the reframing of cultural policy narrative which in turn urged a reassessment of methods of cultural management reflecting the same concerns among the sector s grassroots The idea of sustainability and culture working together and their envisioned role in future proofing society and human development captured the imagination of cultural commentators policy makers and practitioners alike keen to fulfil these principles out there in cultural organizations and events mega and small in cities and regions local and global The papers in this Special Issue reflect this appeal This publication covers a wide selection of issues related to sustainable cultural management which means that it can be recommended to a varied audience First of all it can be recommended to managers experienced in cultural management where success is measured more by the degree of mission accomplishment and the social benefits achieved rather than by profit Another group comprises the employees of cultural organizations who want to improve their knowledge of sustainable cultural management This Special Issue can also be recommended to artists researchers students state and local government employees founders and patrons of art and all those who want to understand the importance of sustainable cultural management **International Books in Print** ,1997
