(Re)Constructing Memory: School Textbooks and the Imagination of the Nation James H. Williams, 2014-08-08 This book examines the shifting portrayal of the nation in school textbooks in 14 countries during periods of rapid political social and economic change Drawing on a range of analytic strategies the authors examine history and civics textbooks and the teaching of such texts along with other prominent curricular materials children s readers a required text penned by the head of state a holocaust curriculum etc The authors analyze the uses of history and pedagogy in building reinforcing and or redefining the nation and state especially in the light of challenges to its legitimacy The primary focus is on countries in developing or transitional contexts Issues include the teaching of democratic civics in a multiethnic state with little history of democratic governance shifts in teaching about the Khmer Rouge in post conflict Cambodia children s readers used to define national space in former republics of the Soviet Union the development of Holocaust education in a context where citizens were both victims and perpetrators of violence the creation of a national past in Turkmenistan and so forth The case studies are supplemented by commentary an introduction and conclusion EUDISED European Educational Research Yearbook 1997/98 ,1999 Bulletin Scranton Public Library (Scranton, Pa.),1908 **The Publishers Weekly** ,1926 Bulletin of the Scranton Public Library Scranton Public Library (Scranton, Pa.),1908 **British Books in Print** ,1979 **We the People--** ,1988 Civics textbook with an emphasis on the U S Constitution and Bill of Rights *Civic Education* Richard G. Niemi,Jane Junn,2005-05-11 Sound democratic decisions rely on a citizenry with at least a partial mastery of the rules and workings of democratic government American high schools where students learn the basics of citizenship thus ought to play a critical role in the success of democracy Yet studies examining the impact of high school government and civics courses on political knowledge over the past quarter century have generally shown that these courses have little or no effect In this important book Richard G Niemi and Jane Junn take a fresh look at what America s high school seniors know about government and politics and how they learn it The authors argue convincingly that secondary school civics courses do indeed enhance students civic knowledge This book is based on the most extensive assessment to date of civic knowledge among American youth the 1988 National Assessment of Education Progress NAEP Civics Assessment The authors develop and test a theoretical model to explain the cognitive process by which students learn about politics and they conclude by suggesting specific changes in the style and emphasis of civics teaching Arts & Humanities Citation Index ,1996 *Internationales Verlagsadressbuch Mit ISBN-Register* ,1982 **Civic Education & Culture** Bradley C. S. Watson,2005 What do we teach our citizens This great Platonic question is as crucial today as it has ever been America and the West come to terms with this question in the context of their richly diverse technologically sophisticated fundamentally individualistic societies Virtually all would agree that such diversity sophistication and freedom are positive political and cultural goods but many would also argue that they militate against the coherence that all regimes and civilizations must in some way demand The nature extent

and coherence of civic education are perhaps the greatest determinants of a regime's politics and culture and the regime can in turn do much to foster the right kind of civic education. This book presents the insights of renowned scholars and writers including Stephen H. Balch, Timothy Fuller, and Roger Kimball, who have thought broadly and deeply about the role that education at all levels plays in promoting, maintaining, or undermining our politics, culture, and society.
