✓ Exclusively available on IvyPanda

The Civil Rights Movement in its modern form was characteristic for the development of the American society during the period of the 1950s-1980s. The movement was started as the reaction of the African Americans to the social segregation and discrimination.

The protests against segregation and discrimination were actively supported by the public, and President Kennedy initiated the discussion of the Civil Rights Act of 1964 to stop racial discrimination in the American society.

Although the positive role of the Civil Rights Movement for changing the role of the African Americans in the American society is visible, this topic is also essential to be discussed because the movement for the African Americans' rights provoked the associated movements against the social and gender inequality.

Thus, many effects of the Civil Rights Movement are observed in the modern American society which develops resolving the challenging questions of racism and inequality. That is why, this research aims to answer an important question: What modern effects of the Civil Rights Movement related to the issues of racism, discrimination, and inequality can be noticed in the present-day American society?

To explain the effects of the Civil Rights Movement from the sociological perspectives, it is necessary to refer to the functionalist, conflict, and interactionist theories.

Many modern researchers focus on the functionalist perspective and agree that the Civil Rights Movement influenced the society positively, and these effects can be observed today because the society is transformed, the problems of racism and inequality are discussed openly; referring to the conflict perspective, it is possible to note that discrimination is illegal, and the principle of the social justice and gender equality are followed.

Following the functionalist perspective, it is essential to state that the society develops as the whole composed of connected parts which should interact according to the idea of social balance.
