**An Ed-Tech Tragedy?** Mark West, 2025-10-10 The COVID 19 pandemic pushed education from schools to educational technologies at a pace and scale with no historical precedent For hundreds of millions of students formal learning became fully dependent on technology whether internet connected digital devices televisions or radios An Ed Tech Tragedy examines the numerous adverse and unintended consequences of the shift to ed tech It documents how technology first solutions left a global majority of learners behind and details the many ways education was diminished even when technology was available and worked as intended Using tragedy as a metaphor and borrowing the organization of a three act theatrical play the book shows how technology first modes of learning introduced novel health and safety risks handed significant control of public education to for profit companies expanded invasive digital surveillance and carried detrimental environmental repercussions in addition to adversely impacting educational access equity quality and outcomes in most contexts Dedicated sections consider alternative and less technology reliant educational responses to COVID 19 disruptions that had the potential to be more inclusive and equitable The analysis further explains how pandemic models of learning are rippling beyond school closures and influencing the future of education Holistically the work invites readers to reconsider a turbulent chapter in education history and reexamine the purposes and roles of technology in education

**Civil Society and the Reform of Finance** Charles McDaniel, Jr., 2015-07-16 Efforts to resolve the recent financial crisis have obscured a more deeply rooted financialization crisis that impacts not only the market economy but also the vital civic and moral traditions that support it This book reveals the cultural influence of finance in reshaping the foundations of American civil society and proposes a return to certain first principles of the Republic to restore the nation s economic vision This book demonstrates how funding concerns and financial incentives revalue faith traditions educational institutions non profit organizations and even the nation s healthcare system in ways that are eroding the diversity of American culture These changes also undermine the ethical framework of both democratic government and the free market system While financial influence has diminished the value of civil society this book proposes that revitalized intermediary institutions still offer the best path forward in restoring the financial sector and more broadly enriching the American competitive ethic toward development of a more virtuous economy The book is written for an academic and professional audience offering a blueprint for the involvement of civil society with government in providing more communally integrated oversight that could contribute to a genuine democratization of finance

**Energy and Transport in Green Transition** Atle Midttun, Nina Witoszek, 2015-06-26 This book breaks new ground in the studies of green transition It frames the ongoing transformation in terms of a battle of modernities with the emerging vision of ecomodernity as the final destination It also offers a systematic exploration of the potential for extensive transformation of carbon intensive sectors with a focus on energy and transport towards a low or post carbon economy The book does so in a comparative perspective by pointing to a diversity of techno economic and institutional solutions in the

mature Western economies and in the rapidly growing East and developing South The contributors highlight a broad spectrum of available alternatives as well as illuminate conflicting interests involved They also demonstrate how solutions to the climate challenge require parallel technological and governance innovation The book advocates a new overarching vision and agenda of ecomodernity based on a synergistic paradigm shift in industry politics and culture to trigger and sustain the ecological innovation necessary to tip development in a green direction This vision cannot be monolithic rather it should reflect the diverse interests and conditions of the global population This book is aimed at researchers and postgraduate students of energy transport environmental and climate policies as well as development environment innovation and sustainability

**Innovate to Dominate** Tai Ming Cheung, 2022-08-15 In *Innovate to Dominate* Tai Ming Cheung offers insight into why how and whether China will overtake the United States to become the world's preeminent technological and security power This examination of the means and ends of China's quest for techno security supremacy is required reading for anyone looking for clues as to the long term direction of the global order The techno security domain Cheung argues is where national security innovation and economic development converge and it has become the center of power and prosperity in the twenty first century China's paramount leader Xi Jinping recognizes that effectively harnessing the complex interactions among security innovation and development is essential in enabling China to compete for global dominance Cheung offers a richly detailed account of how China is building a potent techno security state In *Innovate to Dominate* he takes readers from the strategic vision guiding this transformation to the nuts and bolts of policy implementation The state led top down mobilizational model that China is pursuing has been a winning formula so far but the sternest test is ahead as China begins to compete head to head with the United States and aims to surpass its archrival by mid century if not sooner *Innovate to Dominate* is a timely and analytically rigorous examination of the key strategies guiding China's transformation of its capabilities in the national technological military and security spheres and how this is taking place Cheung authoritatively addresses the burning questions being asked in capitals around the world Can China become the dominant global techno security power And if so when

Simate,Elias Matinde,2017-06-27 Increasingly stringent environmental regulations and industry adoption of waste minimization guidelines have thus stimulated the need for the development of recycling and reuse options for metal related waste This book therefore gives an overview of the waste generation recycle and reuse along the mining beneficiation extraction manufacturing and post consumer value chain This book reviews current status and future trends in the recycling and reuse of mineral and metal waste and also details the policy and legislation regarding the waste management health and environmental impacts in the mining beneficiation metal extraction and manufacturing processes This book is a useful reference for engineers and researchers in industry policymakers and legislators in governance and academics on the current status and future trends in the recycling and reuse of mineral and metal waste Some of the key features of the book are as follows Holistic approach to waste generation recycling and reuse along the minerals and metals extraction Detailed overview of metallurgical waste generation Practical examples with complete flow sheets techniques and interventions on waste management Integrates the technical issues related to efficient resources utilization with the policy and regulatory framework Novel approach to addressing future commodity shortages     *New Media and Revolution* Billie Jeanne Brownlee,2020-07-16 The Arab Spring did not arise out of nowhere It was the physical manifestation of more than a decade of new media diffusion use and experimentation that empowered ordinary people during their everyday lives In this book Billie Jeanne Brownlee offers a refreshing insight into the way new media can facilitate a culture of resistance and dissent in authoritarian states Investigating the root causes of the Syrian uprising of 2011 *New Media and Revolution* shows how acts of online resistance prepared the ground for better organised street mobilisation The book interprets the uprising not as the start of Syria s social mobilisation but as a shift from online to offline contestation and from localised and hidden practices of digital dissent to tangible mass street protests Brownlee goes beyond the common dichotomy that frames new media as either a deus ex machina or a means of expression to demonstrate that in Syria media was a nontraditional institution that enabled resistance to digitally manifest and gestate below within and parallel to formal institutions of power To refute the idea that the population of Syria was largely apathetic and apolitical prior to the uprising Brownlee explains that social media and technology created camouflaged geographies and spaces where individuals could protest without being detected Challenging the myth of authoritarian stability *New Media and Revolution* uncovers the dynamics of grassroots resistance blossoming under the radar of ordinary politics     **Stopping the Spies** Jane Duncan,2018-06-01 Is South Africa on its way

to becoming a surveillance state and will it need a whistleblower In 2013 former National Security Agency NSA contractor Edward Snowden leaked secret documents revealing that state agencies like the NSA had spied on the communications of millions of innocent citizens International outrage resulted but the Snowden documents revealed only the tip of the surveillance iceberg Apart from insisting on their rights to tap into communications more and more states are placing citizens under surveillance tracking their movements and transactions with public and private institutions The state is becoming like a one way mirror where it can see more of what its citizens do and say while citizens see less and less of what the state does owing to high levels of secrecy around surveillance In this book Jane Duncan assesses the relevance of Snowden s revelations for South Africa In doing so she questions the extent to which South Africa is becoming a surveillance society governed by a surveillance state Duncan challenges members of civil society to be concerned about and to act on the ever expanding surveillance capacities of the South African state Is surveillance used for the democratic purpose of making people safer or is it being used for the repressive purpose of social control especially of those considered to be politically threatening to ruling interests She explores the forms of collective action needed to ensure that unaccountable surveillance does not take place and examines what does and does not work when it comes to developing organised responses
