J. Duiker, 2002 *Library of Congress Catalogs* Library of Congress, 1980 *Who Made American Schools Marxist Training Centers?* Diana L. Anderson, Gary L. Clark, 2022-10-27

Nine philosopher kings were commissioned to undergird the articles of Marxist faith while expunging dogma and religious doctrine. Their seeds of a pre-ordained organic philosophy were planted to upbring young sprouts to destroy the American republic and rebuild from that rubble the next Marxist country. The unrelenting pressures to indoctrinate children with the Marxist family of totalitarian ideologies that promises to free the child comes to communities under various guises. The allure of promises made in the name of fairness, equity, tolerance, and more recent of social justice has drawn a large percentage of millennials to socialism. Behind the race-baited mantras, metro regional government is working for the eventual transformation of schools as learning centers staffed with soviet councils to transform neighborhoods into self-sustaining eco-villages. Children will be socialized as activists for their community to install Fascist green agendas paired with Marxist social justice.

Think, 1938 *PC Gamer*, 2008 *The Discourses of Environmental Collapse* Alison E. Vogelaar, Brack W. Hale, Alexandra Peat, 2018-03-22. In recent years, environmental collapse has become an important way of framing and imagining environmental change and destruction, referencing issues such as climate change, species extinction, and deteriorating ecosystems. Given its pervasiveness across disciplines and spheres, this edited volume articulates environmental collapse as a discursive phenomenon worthy of sustained critical attention. Building upon contemporary conversations in the fields of archaeology and the natural sciences, this volume coalesces, explores, and critically evaluates the diverse array of literatures and imaginaries that constitute environmental collapse. The volume is divided into three sections: Doc Collapse, Pop Collapse, and Craft Collapse, that independently explore distinct modes of representing and implicit attitudes toward environmental collapse from the lenses of diverse fields of study, including climate science and policy, cinema, and photojournalism. Bringing together a broad range of topics and authors, this volume will be of great interest to scholars of environmental communication and environmental humanities.
