DOMINATOR 150

## Technical Systems

### Electric System

JoeManual.com **SERVICE & PARTS**

What makes things happen?  
 Electrons move from inside conductors  
 to outside conductors.  
 How?  
 Moving with currents

**Electricity**

The charged particles inside the wire (e.g.,  $\text{Al}^{3+}$  ions) in the  
 aluminum wire have the role of  $\text{e}^-$  after the electric conductivity of  
 the lattice. It is important that the metal lattice is not a perfect  
 crystal. The charged particles are not moving along the wire.

**Superconductivity**

Superconductivity is a state of matter where the resistance to the flow of  
 electric current is zero. It is a property of certain materials that are cooled  
 to very low temperatures.

**Quantum mechanics**

Quantum mechanics is a branch of physics that deals with the behavior of  
 particles at the atomic and subatomic level. It is a fundamental theory  
 that describes the behavior of matter and energy at the smallest scales.
