

When performing adjustment and maintenance work strictly comply with the safety regulations in the operating instructions! These concise operating instructions do not replace the general operating instructions.

Hitching up to the tractor

Constant PTO-shaft speed $\Rightarrow$ optimal baling performance

Hydraulic system: from 42 l/min up to preferably 80 l/min at the quick release coupling on the tractor

Electrics: 10.5 V to 16.5 V

horizontal hitching $\Rightarrow$ optimal baling performance

General operation

- The control box must be switched off before starting the tractor engine.
- For baling the control box must be switched on, as otherwise the baling pressure control is not active.
- Baling pressure and soft core setting must be adapted to the harvested material (R).

800294

Recommendation without active hydraulic system (up to 73002216, 73201117)

Silage: 0...2.5; soft core = adjusted bale minus 30 cm
Hay: 2...4.5; soft core = adjusted bale minus 60...70 cm
Straw: 3...5.0; soft core = adjusted bale minus 50 cm

The higher the moisture content of the harvested material, the lower should the baling pressure be selected.

Recommendation with active hydraulic system (from 73002217, 73201118)

Silage: 0...1.5 without soft core
Hay: 2...4.5; soft core = adjusted bale minus 60...70 cm
Straw: 3...5.0; soft core = adjusted bale minus 50 cm

Optimal swath form and drive operation results in evenly formed bales.

With single-sided filling drive in direction of the control lamps (F).

Short crop baffle: install for short crop and small swaths; remove for big swaths $\Rightarrow$ optimal baling performance.

Filler plates (B): remove from both sides when used for silage, assemble for other cases.

Twine wrapping: Belt brake (R) tension
Net wrapping: Belt brake (R) relieve

Due to the different friction values of the various net qualities, the adjustment (Y) must be adapted (see operating instructions).

Recommendation: Use CLAAS Rolltex Plus net. Clean the net trough at regular intervals, after longer periods of rest pull the net back for approx. 2 cm to ensure reliable infeed of net.

- Open the tailgate on the bale ejector completely; do not brake the bale with the tailgate.
- Switch off the PTO-shaft when opening the tailgate for a longer period of time.
- When closing the tailgate the belts must run.
- Disassembled cutting blades must be replaced by dummy blades.
- Sharpen cutting blades at regular intervals $\Rightarrow$ this reduces the fuel consumption and enhances the cutting quality.

Claas Variant 280 Rc Manual
