

Connecting Concept 7

- 1.) What is your favorite meal? What macromolecules are present in each of the food items in your favorite meal? *Be sure to cite any sources you find!

My favorite meal is just pizza. There are carbs, proteins and lipids in pizza. The carbs come from the crust and sauce. Proteins and lipids are found in cheese. [Source](#)

- 2.) Are there any macromolecules that are missing from your meal? If so, which ones?

Pizza has all three of the main macromolecules used for energy. They may not come in the healthiest of forms, but they are all present.

- 3.) Do you think if you ate this meal for every meal it would be sustainable for your health and functioning? Why or why not?

I think it depends on the toppings for pizza. If you ate veggie pizza for every meal I think it would be sustainable. It has all the sources of energy your body needs to function.

- 4.) What are the biological functions of the macromolecule(s) you listed in part A? How do you think eliminating this macromolecule from one's diet could affect human health and functioning?

Carb: The primary source of energy for the body. It includes things like sugar that give energy.

Protein: Protein is used to help rebuild tissue in the body. They are mostly amino acids.

Fats: fats are used as insulation for the body and help protect key organs.

If any one of these is eliminated your health will suffer. It's important to maintain a healthy diet containing all three in various amounts to stay functioning best.
