City Point New York Yimby:

Environmental & Social Justice Challenges Near America's Most Popular Museums, Parks, Zoos & Other Heritage Attractions Michael Greenberg, 2022-08-09 This book examines environmental and social justice challenges near America's most popular heritage attractions. These include over 100 places that host national parks e.g. Glacier Yellowstone zoos e.g. Bronx Henry Doorly urban parks e.g. Central Park Fairmount grand concourses e.g. 5th Avenue Massachusetts Avenue and multiple museums and galleries e.g. National Gallery Getty. The book includes measurements of demographics air quality distance from hazards health outcomes and urban assets in the areas immediately surrounding these heritage sites and compares them with adjacent areas and their host cities or states. It considers the history of justice related issues near the sites and evaluates what owners managers and communities are doing to address gentrification displacement the legacy of redlining and other challenges such as the animal rights movement climate change sustainability and tight budgets. The book examines what some host cities are doing about affordable housing and what some heritage sites have done in establishing constructive relationships with surrounding communities. The book should have two primary audiences. One is the strong and growing social and environmental justice community that has increasingly been scrutinizing parks and other icons for evidence of injustice. This book will interest them even though all the results do not necessarily support their positions. The second audience is businesses not for profits and government agencies who manage parks zoos museums and other attractions and need to understand what is happening near their sites and what they can do to be better neighbours.

Wonder City Lynn Ellsworth, 2025-05-06 Reimagining our cities for a sustainable and human centric future. In her groundbreaking book *Wonder City* Lynn Ellsworth delves deep into the heart of modern urban life casting a critical eye on the transformative changes sweeping through cities like New York. This compelling journey into the world of urban development goes beyond the usual narrative serving as a passionate call to action that encourages readers to actively participate in shaping the future of their cities. Ellsworth expertly navigates through complex themes such as affordable housing urban planning historic preservation and architecture. With a focus on major cities undergoing significant transformations *Wonder City* offers an insightful examination of the challenges and opportunities that define contemporary urban life. At the core of this engaging narrative is a striking critique of the real estate industry's influence over urban landscapes. Ellsworth reveals how historic and culturally rich urban settings are increasingly being overshadowed by the rise of impersonal glass towers a trend she argues is driven by the industry's grip on politicians and technocrats. This analysis is both eye opening and unsettling shedding light on the forces reshaping our urban environments. *Wonder City* is more than a critique however Ellsworth provides a pragmatic blueprint for revitalizing urban spaces. She champions the need for affordable housing sustainable urban planning and architecture that respects and enhances the human experience. Her arguments challenge the prevailing economic theories behind housing supply and question the architectural ideologies that

often justify the demolition of historic urban assets This book is an essential read for urban planners policymakers and anyone interested in the future of urban living Ellsworth s clear accessible insights into complex issues make Wonder City a vital contribution to the discourse on urban development appealing to a broad audience that cares about the dynamics and future of city life Introduction to Homeland Security, Third Edition David H. Tom Angotti,Sylvia Morse,2023-04-25 Gentrification and displacement of low income communities of color are major issues in New York City and the city s zoning policies are a major cause Race matters but the city ignores it when shaping land use and housing policies The city promises affordable housing that is not truly affordable *Zoned Out* shows how this has played in Williamsburg Harlem and Chinatown neighborhoods facing massive displacement of people of color It looks at ways the city can address inequalities promote authentic community based planning and develop housing in the public domain
