Babalola, Igbinobu Chuks, 2015 Hell In A Cell Kolawole Ojo, Ojo S. Kolawole, 2019-03-16 Lost in between focus and

distraction is a young boy during the final year of his secondary school education His mom noticed his level of unseriousness and decided to take him to the hostel of the school where she taught to increase his potency academic excellence little did she know of the plan life had in store for her and for him At the peak of the situation the boy was left with two options to give in or to focus The choice he made made an outrageous plot in this book *Civic Education & Culture* Bradley C. S. Watson,2005 What do we teach our citizens This great Platonic question is as crucial today as it has ever been America and the West come to terms with this question in the context of their richly diverse technologically sophisticated fundamentally individualistic societies Virtually all would agree that such diversity sophistication and freedom are positive political and cultural goods but many would also argue that they militate against the coherence that all regimes and civilizations must in some way demand The nature extent and coherence of civic education are perhaps the greatest determinants of a regime s politics and culture and the regime can in turn do much to foster the right kind of civic education This book presents the insights of renowned scholars and writers including Stephen H Balch Timothy Fuller and Roger Kimball who have thought broadly and deeply about the role that education at all levels plays in promoting maintaining or undermining our politics culture and society **Library of Congress Information Bulletin** ,2004 *Civic Education* Richard G. Niemi,Jane Junn,2005-05-11 Sound democratic decisions rely on a citizenry with at least a partial mastery of the rules and workings of democratic government American high schools where students learn the basics of citizenship thus ought to play a critical role in the success of democracy Yet studies examining the impact of high school government and civics courses on political knowledge over the past quarter century have generally shown that these courses have little or no effect In this important book Richard G Niemi and Jane Junn take a fresh look at what America s high school seniors know about government and politics and how they learn it The authors argue convincingly that secondary school civics courses do indeed enhance students civic knowledge This book is based on the most extensive assessment to date of civic knowledge among American youth the 1988 National Assessment of Education Progress NAEP Civics Assessment The authors develop and test a theoretical model to explain the cognitive process by which students learn about politics and they conclude by suggesting specific changes in the style and emphasis of civics teaching *The Municipal Year Book and Public Services Directory* ,1996 **Civic Education in the Twenty-first Century** Michael T. Rogers,Donald M. Gooch,2015 With *Civic Education in the Twenty First Century* we call for the United States to make these practices less isolated and more common throughout the county The volume is broken into three major sections First there are four chapters exploring the history and philosophical debates about civic education particularly with respect to its role in America s educational institutions Then the second section provides seven groundbreaking inquiries into how politicians and political institutions can promote civic education and engagement through their routine operations As some examples this section explores how politicians through campaigns and judiciaries through community programs enhance civic knowledge and encourage civic engagement This

section also explores how new technologies like the Internet and social media are increasingly used by government institutions and other entities to encourage a more politically informed and engaged citizenry *Who's who and why in After-war Education*, 1921 **Making Better Citizens** Civic Education Foundation, Cambridge, Mass, 1952 **Civic Education for Diverse Citizens in Global Times** Beth C. Rubin, James M. Giarelli, 2013-10-11 This book explores four interrelated themes rethinking civic education in light of the diversity of U S society re examining these notions in an increasingly interconnected global context re considering the ways that civic education is researched and practiced and taking stock of where we are currently through use of an historical understanding of civic education There is a gap between theory and practice in social studies education while social studies researchers call for teachers to nurture skills of analysis decision making and participatory citizenship students in social studies classrooms are often found participating in passive tasks e g quiz and test taking worksheet completion listening to lectures rather than engaging critically with the curriculum Civic Education for Diverse Citizens in Global Times directed at students researchers and practitioners of social studies education seeks to engage this divide by offering a collection of work that puts practice at the center of research and theory

Making Civics Count David E. Campbell, Meira Levinson, Frederick M. Hess, 2012-10-01 By nearly every measure Americans are less engaged in their communities and political activity than generations past So write the editors of this volume who survey the current practices and history of citizenship education in the United States They argue that the current period of creative destruction when schools are closing and opening in response to reform mandates is an ideal time to take an in depth look at how successful strategies and programs promote civic education and good citizenship Making Civics Count offers research based insights into what diverse students and teachers know and do as civic actors and proposes a blueprint for civic education for a new generation that is both practical and visionary *Civic Education and the Future of American Citizenship* Elizabeth Kaufer Busch, Jonathan W. White, 2012-11-02 The Founders of this nation believed that the government they were creating required a civically educated populace Such an education aimed to cultivate enlightened informed and vigilant citizens who could perpetuate and improve the nation Unfortunately America s contemporary youth seem to lack adequate opportunities if not also the ability or will to critically examine the foundations of this nation An even larger problem is an increasing ambivalence toward education in general Stepping into this void is a diverse group of educators intellectuals and businesspeople brought together in Civic Education and the Future of American Citizenship to grapple with the issue of civic illiteracy and its consequences The essays edited by Elizabeth Kaufer Busch and Jonathan W White force us to not only reexamine the goals of civic education in America but also those of liberal education more broadly

Civic Education and the Future of American Citizenship Elizabeth Kaufer Busch, Jonathan W. White, 2013 Lack of civic knowledge ignorance about the U S Constitution and general ambivalence about education threaten the fiber of this nation The remedy to this malaise advocated in various ways by a diverse group of contributors is a well rounded liberal education
