Niemi,Jane Junn,2005-05-11 Sound democratic decisions rely on a citizenry with at least a partial mastery of the rules and workings of democratic government American high schools where students learn the basics of citizenship thus ought to play a critical role in the success of democracy Yet studies examining the impact of high school government and civics courses on political knowledge over the past quarter century have generally shown that these courses have little or no effect In this important book Richard G Niemi and Jane Junn take a fresh look at what America s high school seniors know about government and politics and how they learn it The authors argue convincingly that secondary school civics courses do indeed enhance students civic knowledge This book is based on the most extensive assessment to date of civic knowledge among American youth the 1988 National Assessment of Education Progress NAEP Civics Assessment The authors develop and test a theoretical model to explain the cognitive process by which students learn about politics and they conclude by suggesting specific changes in the style and emphasis of civics teaching The Civic Education Project ...  students to the four ideas which are basic to our constitutional form of government authority privacy responsibility and
 justice *The New Civics* Education Commission of the States,2013 Preparing students to be engaged productive citizens is
 one of the foundational purposes of public education in the United States Thomas Jefferson John Adams Horace Mann to
 name a few all espoused free universal public education as the key element that was necessary to maintain the integrity of
 the American republic over time Public schools remain as the best avenue to ensure that citizens possess the knowledge skills
 and dispositions needed for productive participation in civic and political life While the role that civic education plays in
 public schools has been reduced somewhat in the last 50 years the civic education field has continued to make significant
 strides in identifying best practices for civic education Today's best practices for civic learning are widely divergent from the
 textbook based high school civics classes that were dominant 25 years ago We now know that active civic learning as
 opposed to flat civic learning is essential to meeting the civic purposes of public education This issue of *The Progress of*
Education Reform provides a close look at the new civics how it differs from previous practices what it includes how it is
 supported by research and its implications for policy Contains 5 tables 8 resources and 25 endnotes **Civic Education &**
Culture Bradley C. S. Watson,2005 What do we teach our citizens This great Platonic question is as crucial today as it has
 ever been America and the West come to terms with this question in the context of their richly diverse technologically
 sophisticated fundamentally individualistic societies Virtually all would agree that such diversity sophistication and freedom
 are positive political and cultural goods but many would also argue that they militate against the coherence that all regimes
 and civilizations must in some way demand The nature extent and coherence of civic education are perhaps the greatest
 determinants of a regime's politics and culture and the regime can in turn do much to foster the right kind of civic education
 This book presents the insights of renowned scholars and writers including Stephen H Balch Timothy Fuller and Roger
 Kimball who have thought broadly and deeply about the role that education at all levels plays in promoting maintaining or
 undermining our politics culture and society **Civics for the World to Come** Nicole Mirra,Antero Garcia,2023-07-25 Help
 students use their voices to build an equitable and just society Years of political violence and protests against injustice have
 revived interest in teaching civics in schools The problem Civic education as it currently exists privileges systems not
 students It promotes incremental change within a broken democracy rather than responding to the youth led movements that
 call for the abolition of inequitable social structures What will it take to prepare young people for the just future they are
 fighting for *Civics for the World to Come* offers educators a framework for designing the critical civic education that our
 students deserve Synthesizing perspectives on democratic life from critical race theory ethnic studies Afrofuturism and
 critical literacy the book presents key practices for cultivating youth civic agency grounded in equity and justice The authors
