Civic Education Richard G. Niemi, Jane Junn, 2005-05-11 Sound democratic decisions rely on a citizenry with at least a partial mastery of the rules and workings of democratic government American high schools where students learn the basics of citizenship thus ought to play a critical role in the success of democracy Yet studies examining the impact of high school government and civics courses on political knowledge over the past quarter century have generally shown that these courses have little or no effect In this important book Richard G Niemi and Jane Junn take a fresh look at what America s high school seniors know about government and politics and how they learn it The authors argue convincingly that secondary school civics courses do indeed enhance students civic knowledge This book is based on the most extensive assessment to date of civic knowledge among American youth the 1988 National Assessment of Education Progress NAEP Civics Assessment The authors develop and test a theoretical model to explain the cognitive process by which students learn about politics and they conclude by suggesting specific changes in the style and emphasis of civics teaching

Barton, 2024-10-01 Speaking to the need to move beyond traditional formulations this textbook presents radical visions for transforming civic education in the United States Drawing on the experience of educators and scholars including those rooted in feminist queer abolitionist global and race conscious perspectives this work offers new practical ideas for civic education reform Responding to recent political crises many scholars educators and public commentators have called for a rebirth of civic education but these all are grounded in the premise that the goal of civic education should be to teach students about the U S Constitutional system and how to operate within it This book argues that the U S governmental system including the Constitution is infused with racist and anti democratic premises and procedures It asks How can we seek a new path one that is more democratic more equitable and more humane A diverse range of leading civic educators who are willing not just to push the boundaries of civic education but to operate outside its assumptions altogether explore what future possibilities for civic education might look like and how these innovative ideas could be implemented in the classroom Combining theory with practice The Future of Civic Education will be important reading for those studying or researching in social studies methods social studies issues citizenship and civic education It will also be beneficial to social studies teachers at elementary and secondary levels as well as policymakers and non governmental organizations NGOs **Civic Education** David Snedden, 1923 **Teaching Civic Literacy Projects** Shira Eve Epstein, 2014 This practical resource shows teachers how to enact robust forms of civic education in today s schools Both instructive and thought provoking it will inspire teachers to craft curricula addressing a wide range of
