

## CHAPTER 7 | *IMPULSE AND MOMENTUM*

### *ANSWERS TO FOCUS ON CONCEPTS QUESTIONS*

---

1. (b) Kinetic energy,  $\frac{1}{2}mv^2$ , is a scalar quantity and is the same for both cars. Momentum,  $mv$ , is a vector quantity that has a magnitude and a direction. The two cars have different directions, so they have different momenta.
2. (d) Momentum is a vector quantity that has a magnitude and a direction. The magnitudes ( $m_0v_0$ ) and directions (due north) are the same for both runners.
3. The magnitude of the total momentum is  $47\,700\text{ kg}\cdot\text{m/s}$ .
4. (d) According to the impulse-momentum theorem, the impulse is equal to the final momentum minus the initial momentum. Therefore, the impulses are the same in both cases, since the final momenta are the same and the initial momenta are the same. The impulse is also the product of the net average force and the time of impact. Since the impulses are equal and the time of impact is larger for the air mattress than for the ground, the air mattress exerts a smaller net average force on the high jumper.
5. The impulse is  $+324\text{ kg}\cdot\text{m/s}$ .
6. (c) According to the impulse-momentum theorem, the impulse is equal to the change in the particle's momentum. The magnitude of the momentum change is the same in regions A and C; therefore, in these regions the particle experiences impulses of the same magnitude. The momentum in region B is constant. Therefore, the change in momentum is zero, and so is the impulse.
7. (b) According to the impulse-momentum theorem, the net average force is equal to the change in the particle's momentum divided by the time interval. This ratio is greatest in region C. The ratio is equal to zero in region B, since the change in the particle's momentum is zero there.
8. Magnitude of net average force in Region A =  $1.0\text{ N}$ ,  
Magnitude of net average force in Region C =  $4.0\text{ N}$
9. (d) Since there are no external forces acting on the rocket, momentum is conserved before, during, and after the separation. This means that the momentum of the rocket before the separation ( $+150\,000\text{ kg}\cdot\text{m/s}$ ) is equal to the sum of the momenta of the two stages after the separation [ $+250\,000\text{ kg}\cdot\text{m/s} + (-100\,000\text{ kg}\cdot\text{m/s}) = +150\,000\text{ kg}\cdot\text{m/s}$ ].

## **Concept Development 7 Momentum Answer Key:**

**Strategy Savvy** Hesham Dinana, 2022-08-11 With the COVID 19 pandemic many business leaders question the need for strategy and the value of strategic planning and management in today's environment. This book will demonstrate that our approach to strategy development and implementation needs to change to be able to help organizations change. The proposed new approach in this book can provide insights and perspectives to keep strategy relevant by Putting Strategy in Action through developing a Making the Future Happen Today way of thinking and living. Many strategy books focus on the perspective of large multinational corporations that have the capacity and capabilities to develop and implement a strategy using very structured methodologies and tools. This book will add a new dimension by focusing on the use of Strategy as Practice. SaP intuition and serendipity as important complements that can be used by large corporations as well as small and medium sized enterprises, SMEs and entrepreneurs to develop and implement winning strategies. This is an important dimension to support the strategic decision making process that is frequently undermined in traditional strategic planning and management focused books. The author theorizes that developing into a Strategy Savvy professional is about embracing two of the most important concepts in strategy development: Proactivity and Sustainability. This book addresses the opportunities and threats presented by VUCA: Volatility, Uncertainty, Complexity, and Ambiguity, and how we can capitalize on those opportunities to create unprecedented growth opportunities in Society 5.0 that is shaping new economies such as the Digital Economy, the Experience Economy, the Sharing Economy, the GIG Economy, the Purpose Economy, and the Circular Economy. The author also proposes a new approach to strategy development and implementation that mixes formal planning with practice and intuition that is helped by serendipity. He presents a strategy that is driven by four propellers: insights, culture, operations, and digitization to ensure arrival at a better future. *Heat Transfer* Lindon C. Thomas, 1999
