Raymond,1996 The first newspapers or newsbooks appeared in 1641 although the reasons for their appearance have never  
been fully understood The Invention of the Newspaper is the first interdisciplinary account of the origins and early  
development of the English newspaper using both manuscript and printed evidence to account for the precise moment of the  
newsbook s appearance a moment just a few months before the outbreak of civil war Raymond explores the newspaper s  
unique place in the flourishing political print culture of the 1640s showing how newsbooks drew from and then reformed  
elements of literary culture being both produced by a public hunger for news and in turn creating a market for it The  
Inverntion of the Newspaper presents previously unexplored evidence concerning the distribution and readership of  
seventeenth century news publications which suggests that the early newsbooks were widely read and highly influential and  
that even today they exert a considerable influence over the way in which seventeenth century history is perceived Charting  
the newsbook s development as a genre its narrative forms literary merits and influences and its relationship to other  
vehicles of communication printed and spoken such as sermons alamanacs and play pamphlets Raymond presents a detailed  
exploration of the newsbook s gradual dominance of the market for information      **Sources of English History of the
