 This book reviews the distribution of soils across Egypt their history genesis pollution and management  
 The conservation of Egyptian soils soils and their connections to human activities as well as some future soil issues are also highlighted  
 It is well known that soil is the main source for food feed fuel and fiber production  
 Accordingly the study of soils is not only a crucial issue but also an urgent task for all nations worldwide  
 Due to their important roles in agroecosystems as well as many aspects of our lives soils have direct and indirect functions in the agricultural industrial and medicinal sectors  
 Therefore understanding the physical chemical and biological properties of soils as well as soil security have now become emerging issues  
 Climate change has a very dangerous dimension in Egypt concerning the rising sea level  
 Many coastal zones are already threatened by this sea level rise and may ultimately disappear  
 At the same time water shortages and soil pollution represent the main challenges for the Egyptian nation  
 Generally speaking the environmental challenges that Egypt now faces include improving and sustaining soil health soil carbon sequestration wastewater treatment and avoiding the overuse of fertilizers and pesticides  
 Therefore this book examines in detail the soils of Egypt from various perspectives including their genesis history classification pollution and degradation soil security soil fertility and land uses
