Chapter 4 Section 1 Understanding Dem Answers:

Democratic Accountability and International Human Development Kamran Afzal, Mark Considine, 2014-11-27

Scholars and policymakers have long known that there is a strong link between human development and spending on key areas such as education and health. However, many states still neglect these considerations in favour of competing priorities such as expanding their armies. This book examines how states arrive at these decisions, analysing how democratic accountability influences public spending and impacts on human development. The book shows how the broader paradigm of democratic accountability, extending beyond political democracy to also include bureaucratic and judicial institutions as well as taxation and other modes of resource mobilisation, can best explain how states allocate public resources for human development. Combining cross-country regression analysis with exemplary case studies from Pakistan, India, Botswana and Argentina, the book demonstrates that enhancing human capabilities requires not only effective party competition and fair elections but also a particular nesting of public organisational structures that are tied to taxpaying citizens in an undisturbed chain of accountability. It draws out vital lessons for institutional design and our approach to the question of human development, particularly in the less developed states. This book will be of great interest to postgraduate students and researchers in the fields of political economy, public policy, governance and development. It also provides valuable insights for those working in the international relations field, including inside major aid and investment organisations.

The Concept of Liberal Democratic Law Johan van Der Walt, 2019-09-12. This book develops a historical concept of liberal democratic law through readings of the pivotal twentieth-century legal theoretical positions articulated in the work of Herbert Hart, Ronald Dworkin, Duncan Kennedy, Rudolf Smend, Hans Kelsen and Carl Schmitt. It assesses the jurisprudential projects and positions of these theorists against the background of a long history of European metaphysics from which the modern concept of liberal democratic law emerged. Two key narratives are central to this history of European political and legal metaphysics. Both concern the historical development of the concept of *nomos* that emerged in early Greek legal and political thought. The first concerns the history of philosophical reflection on the epistemological and ontological status of legal concepts that runs from Plato to Hobbes, the realist/nominalist debate as it became known later. The second concerns the history of philosophical and political discourses on law, sovereignty and justice that starts with the *nomos* physics debate in fifth-century Athens and runs through medieval, modern and twentieth-century conceptualisations of the relationship between law and power. Methodologically, the reading of the legal theoretical positions of Hart, Dworkin, Kennedy, Smend, Kelsen and Schmitt articulated in this book is presented as a distillation process that extracts the pure elements of liberal democratic law from the metaphysical narratives that not only cradled it but also smothered and distorted its essential aspirations. Drawing together key insights from across the fields of jurisprudence and philosophy, this book offers an important and original re-articulation of the concept of democratic law.
