(Chapter 3) (Motion in a straight line) (Exercises)
(Class 11)

Question 3.20:

Figure gives the $x-t$ plot of a particle executing one-dimensional simple harmonic motion. (You will learn about this motion in more detail in Chapter 14). Give the signs of position, velocity and acceleration variables of the particle at $t = 0.3 \text{ s}$, 1.2 s , -1.2 s .

Answer 3.20:

Negative, Negative, Positive (at $t = 0.3 \text{ s}$)

Positive, Positive, Negative (at $t = 1.2 \text{ s}$)

Negative, Positive, Positive (at $t = -1.2 \text{ s}$)

For simple harmonic motion (SHM) of a particle, acceleration (a) is given by the relation:

$$a = -\omega^2 x \quad \omega \rightarrow \text{angular frequency} \quad \dots (i)$$

$$t = 0.3 \text{ s}$$

In this time interval, x is negative. Thus, the slope of the $x-t$ plot will also be negative. Therefore, both position and velocity are negative.

However, using equation (i), acceleration of the particle will be positive.

$$t = 1.2 \text{ s}$$

In this time interval, x is positive. Thus, the slope of the $x-t$ plot will also be positive. Therefore, both position and velocity are positive.

However, using equation (i), acceleration of the particle comes to be negative.

$$t = -1.2 \text{ s}$$

In this time interval, x is negative. Thus, the slope of the $x-t$ plot will also be negative. Since both x and t are negative, the velocity comes to be positive. From equation (i), it can be inferred that the acceleration of the particle will be positive.

Question 3.21:

Figure gives the $x-t$ plot of a particle in one-dimensional motion. Three different equal intervals of time are shown. In which interval is the average speed greatest, and in which is it the least? Give the sign of average velocity for each interval.

Answer 3.21:

Interval 3 (Greatest), Interval 2 (Least)

Positive (Intervals 1 & 2), Negative (Interval 3)

The average speed of a particle shown in the $x-t$ graph is obtained from the slope of the graph in a particular interval of time.

It is clear from the graph that the slope is maximum and minimum respectively in intervals 3 and 2 respectively. Therefore, the average speed of the particle is the greatest in interval 3 and is the least in interval 2. The sign of average velocity is positive in both intervals 1 and 2 as the slope is positive in these intervals. However, it is negative in interval 3 because the slope is negative in this interval.

The Burning Answer Keith Barnham, 2015-05-15 Our society faces a choice We could be enjoying a sustainable lifestyle but we have chosen not to In three generations we have consumed half the oil produced by photosynthesis over eight million generations In two generations we have used half our uranium resources With threats from global warming oil depletion and nuclear disaster we are running out of options Solar power as Keith Barnham says is our necessary solution Barnham explains that the roots of solar energy lie in a little known equation $E = hf$ an equation which was coincidentally celebrated and explained to the world by Einstein in the same year he discovered $E = mc^2$ He alleges that the former equation has been overlooked in favor of the latter much to our detriment and Barnham is here to offer us a solution We can still turn things around and solar energy is the key In this provocative inspiring passionately argued book Keith Barnham outlines actions that any one and all of us can take to make an impact now and on future generations The Burning Answer is a solar manifesto for the new climate aware generation and a must read for climate change skeptics
