

Polytron 2 XP Ex IR Installation Instructions

Any use of the transmitter requires full understanding and strict observation of the Polytron 2 XP Ex IR "Operating Manual" (P/N 4543225). For Draeger Sensor IR see manual (P/N 90238435).

Installation of the Transmitter

The transmitter shall be mounted vertically (sensor pointing downwards) - at a location with little vibration and stable temperature. The transmitter should be located in an area where a gas leak is most likely to occur.

Use the holes in the transmitter housing to mount the transmitter (see drilling template). For maintenance purposes, leave at least 12 inches (30 cm) of space below the transmitter.

Installation of Electrical Connections

For installation in multi-drop mode, please refer to Polytron 2 XP Ex operating manual.

To connect the transmitter to the controller, use 3 conductor braid shielded cable (16 to 22 AWG). Keep the length of shielding cable as short as possible. Connect the wires to the terminals as indicated on the label. For a current range from 0 to 22 mA, the supply voltage (measured at the transmitter) must be between 10 and 32 V DC.
