Downwind A People S History Of The Nuclear West:

Downwind Sarah Alisabeth Fox,2014 *Downwind* is an unflinching tale of the atomic West that reveals the intentional disregard for human and animal life through nuclear testing by the federal government and uranium extraction by mining corporations during and after the Cold War Sarah Alisabeth Fox highlights the personal cost of nuclear testing and uranium extraction in the American West through extensive interviews with downwinders the Native American and non Native residents of the Great Basin region affected by nuclear environmental contamination and nuclear testing fallout These downwinders tell tales of communities ravaged by cancer epidemics farmers and ranchers economically ruined by massive crop and animal deaths and Native miners working in dangerous conditions without proper safety equipment so that the government could surreptitiously study the effects of radiation on humans In chilling detail *Downwind* brings to light the stories and concerns of these groups whose voices have been silenced and marginalized for decades in the name of patriotism and national security With the renewed boom in mining in the American West Fox s look at this hidden history unearthed from years of field interviews archival research and epidemiological studies is a must read for every American concerned about the fate of our western lands and communities

A Land Apart Flannery Burke,2017-05-02 Winner Spur Award for Best Contemporary Nonfiction Western Writers of America *A Land Apart* is not just a cultural history of the modern Southwest it is a complete rethinking and recentering of the key players and primary events marking the Southwest in the twentieth century Historian Flannery Burke emphasizes how indigenous Hispanic and other non white people negotiated their rightful place in the Southwest Readers visit the region s top tourist attractions and find out how they got there listen to the debates of Native people as they sought to establish independence for themselves in the modern United States and ponder the significance of the U S Mexico border in a place that used to be Mexico Burke emphasizes policy over politicians communities over individuals and stories over simple narratives Burke argues that the Southwest s reputation as a region on the margins of the nation has caused many of its problems in the twentieth century She proposes that as they consider the future Americans should view New Mexico and Arizona as close neighbors rather than distant siblings pay attention to the region s history as Mexican and indigenous space bear witness to the area s inequalities and listen to the Southwest s stories Burke explains that two core parts of southwestern history are the development of the nuclear bomb and subsequent uranium mining and she maintains that these are not merely a critical facet in the history of World War II and the militarization of the American West but central to an understanding of the region s energy future its environmental health and southwesterners conception of home Burke masterfully crafts an engaging and accessible history that will interest historians and lay readers alike It is for anyone interested in using the past to understand the present and the future of not only the region but the nation as a whole

Militarization and the American Century David Fitzgerald,2022-01-13 Taking American mobilization in WWII as its departure point this book offers a concise but comprehensive introduction to the history

of militarization in the United States since 1940 Exploring the ways in which war and the preparation for war have shaped and affected the United States during The American Century Fitzgerald demonstrates how militarization has moulded relations between the US and the rest of the world Providing a timely synthesis of key scholarship in a rapidly developing field this book shows how national security concerns have affected issues as diverse as the development of the welfare state infrastructure spending gender relations and notions of citizenship It also examines the way in which war is treated in the American imagination how it has been depicted throughout this era why its consequences have been made largely invisible and how Americans have often considered themselves to be reluctant warriors In integrating domestic histories with international and transnational topics such as the American empire of bases and the experience of American service personnel overseas the author outlines the ways in which American militarization had and still has global consequences Of interest to scholars researchers and students of military history war studies US foreign relations and policy this book addresses a burgeoning and dynamic field from which parallels and comparisons can be drawn for the modern day

The Hanford Plaintiffs Trisha T. Pritikin, 2020-02-25 For more than four decades beginning in 1944 the Hanford nuclear weapons facility in southeastern Washington State secretly blanketed much of the Pacific Northwest with low dose ionizing radiation the byproduct of plutonium production For those who lived in the vicinity many of them families of Hanford workers the consequences soon became apparent as rates of illness and death steadily climbed despite repeated assurances from the Atomic Energy Commission that the facility posed no threat Trisha T Pritikin who has battled a lifetime of debilitating illness to become a lawyer and advocate for her fellow downwinders tells the devastating story of those who were harmed in Hanford s wake and seeking answers and justice were subjected to yet more suffering At the center of The Hanford Plaintiffs are the oral histories of twenty four people who joined In re Hanford Nuclear Reservation Litigation the class action suit that sought recognition of and recompense for the grievous injury knowingly caused by Hanford Radioactive contamination of American communities was not uncommon during the wartime Manhattan Project nor during the Cold War nuclear buildup that followed Pritikin interweaves the stories of people poisoned by Hanford with a parallel account of civilians downwind of the Nevada atomic test site who suffer from identical radiogenic diseases Against the heartrending details of personal illness and loss and ultimately persistence in the face of a legal system that protects the government on all fronts and at all costs The Hanford Plaintiffs draws a damning picture of the failure of the US Congress and the Judiciary to defend the American public and to adequately redress a catastrophic wrong Documenting the legal medical and human cost of one community s struggle for justice this book conveys in clear and urgent terms the damage done to ordinary Americans in the name of business progress and patriotism

Encountering the Sovereign Other Miriam C. Brown Spiers, 2021-12-01 Science fiction often operates as either an extended metaphor for human relationships or as a genuine attempt to encounter the alien Other Both types of stories tend to rehearse the processes of colonialism in which a sympathetic protagonist encounters and

tames the unknown Despite this logic Native American writers have claimed the genre as a productive space in which they can critique historical colonialism and reassert the value of Indigenous worldviews Encountering the Sovereign Other proposes a new theoretical framework for understanding Indigenous science fiction placing Native theorists like Vine Deloria Jr and Gregory Cajete in conversation with science fiction theorists like Darko Suvin David Higgins and Michael Pinsky In response to older colonial discourses many contemporary Indigenous authors insist that readers acknowledge their humanity while recognizing them as distinct peoples who maintain their own cultures beliefs and nationhood Here author Miriam C Brown Spiers analyzes four novels William Sanders s The Ballad of Billy Badass and the Rose of Turkestan Stephen Graham Jones s It Came from Del Rio D L Birchfield s Field of Honor and Blake M Hausman s Riding the Trail of Tears Demonstrating how Indigenous science fiction expands the boundaries of the genre while reinforcing the relevance of Indigenous knowledge Brown Spiers illustrates the use of science fiction as a critical compass for navigating and surviving the distinct challenges of the twenty first century

The Nature of Hope Char Miller, Jeff Crane, 2019-02-15 The Nature of Hope focuses on the dynamics of environmental activism at the local level examining the environmental and political cultures that emerge in the context of conflict The book considers how ordinary people have coalesced to demand environmental justice and highlights the powerful role of intersectionality in shaping the on the ground dynamics of popular protest and social change Through lively and accessible storytelling The Nature of Hope reveals unsung and unstinting efforts to protect the physical environment and human health in the face of continuing economic growth and development and the failure of state and federal governments to deal adequately with the resulting degradation of air water and soils In an age of environmental crisis apathy and deep seated cynicism these efforts suggest the dynamic power of a politics of hope to offer compelling models of resistance regeneration and resilience The contributors frame their chapters around the drive for greater democracy and improved human and ecological health and demonstrate that local activism is essential to the preservation of democracy and the protection of the environment The book also brings to light new styles of leadership and new structures for activist organizations complicating assumptions about the environmental movement in the United States that have focused on particular leaders agencies thematic orientations and human perceptions of nature The critical implications that emerge from these stories about ecological activism are crucial to understanding the essential role that protecting the environment plays in sustaining the health of civil society The Nature of Hope will be crucial reading for scholars interested in environmentalism and the mechanics of social movements and will engage historians geographers political scientists grassroots activists humanists and social scientists alike

American Health Crisis Martin Halliwell, 2021-05-18 A history of U S public health emergencies and how we can turn the tide Despite enormous advances in medical science and public health education over the last century access to health care remains a dominant issue in American life U S health care is often hailed as the best in the world yet the public health emergencies of today often echo the public health emergencies of
