Douglas Stewart,1914      OSIRIS IV User's Manual ,1981      **Predicting the Winner** Ira Chinoy,2024-05 Winner of the Ray  
Hiebert History of Journalism Published Work Award The history of American elections changed profoundly on the night of  
November 4 1952 An outside the box approach to predicting winners from early returns with new tools computers was  
launched live and untested on the newest medium for news television Like exhibits in a freak show computers were referred  
to as electronic brains and mechanical monsters Yet this innovation would help fuel an obsession with numbers as a way of  
understanding and shaping politics It would engender controversy down to our own time And it would herald a future in  
which the public square would go digital The gamble was fueled by a crisis of credibility stemming from faulty election night  
forecasts four years earlier in 1948 combined with a lackluster presentation of returns What transpired in 1952 is a complex  
tale of responses to innovation which Ira Chinoy makes understandable via a surprising history of election nights as venues  
for rolling out new technologies refining methods of prediction and providing opportunities for news organizations to shine In  
Predicting the Winner Chinoy tells in detail for the first time the story of the 1952 election night a night with continuing  
implications for the way forward from the dramatic events of 2020 21 and for future election nights in the United States  
**Proceedings** ,1978      *The Reference Catalogue of Current Literature* ,1910      Current Issues of Water Management  
Uli Uhlig,2011-12-02 There is an estimated 1 4 billion km<sup>3</sup> of water in the world but only approximately three percent 39  
million km<sup>3</sup> of it is available as fresh water Moreover most of this fresh water is found as ice in the arctic regions deep  
groundwater or atmospheric water Since water is the source of life and essential for all life on the planet the use of this  
resource is a highly important issue Water management is the general term used to describe all the activities that manage  
the optimum use of the world s water resources However only a few percent of the fresh water available can be subjected to  
water management It is still an enormous amount but what s unique about water is that unlike other resources it is  
irreplaceable This book provides a general overview of various topics within water management from all over the world The  
topics range from politics current models for water resource management of rivers and reservoirs to issues related to  
agriculture Water quality problems the development of water demand and water pricing are also addressed The collection of  
contributions from outstanding scientists and experts provides detailed information about different topics and gives a general

overview of the current issues in water management The book covers a wide range of current issues reflecting on current problems and demonstrating the complexity of water management     *An Introductory Guide to EC Competition Law and Practice* Valentine Korah,1994     Reference Catalogue of Current Literature ,1913     *Willing's Press Guide and Advertisers' Directory and Handbook* ,1906     *American Annals of the Deaf* ,1905     **Catalog of Copyright Entries, Third Series** ,1954
