

pass. Further, since EasyJet pre-design seats on-board, passengers sit where they like. This eliminated an unnecessary complexity and speeds up-passenger boarding.

- **No free on-board catering.** Eliminating free catering onboard reduced cost and unnecessary bureaucracy. Passengers can purchase food and refreshments onboard.
- **Efficient use of airports.** EasyJet flies to the less-crowded airports of smaller European cities and avoids the secondary airports in the major cities. These also have lower landing charges, and normally offer faster turnarounds as there are fewer air movements. EasyJet's efficient ground operations enable it to achieve turnarounds of less than 30 minutes. This means EasyJet can achieve more rotations per day, high-frequency routes, maximising the utilisation of aircraft. EasyJet's ability to offer point-to-point travel means that it does not have to worry about forward connections for passengers and their baggage, further simplifying its operations.
- **Paperless operations.** EasyJet has embraced the concept of the paperless office, with all its management and administration undertaken entirely on IT systems. These can be accessed through secure servers from employees in the world thereby reinforcing flexibility in the running of the airline.

QUESTIONS

QUESTIONS

TABLE 2.4 The four-stage model of the strategic role of operations

Stage 1	Internally Neutral	The operations function is internally focused and reactive. They are viewed as a 'necessary evil'. The belief that the organisation hopes for is that operations 'don't screw up'.
Stage 2	Externally Neutral	The operations function starts to be as good as the competition, or its performance parity with industry norms. Such an organisation is likely to benchmark its operations against its competitors, and adopt best practice in its industry, so that it does not hold the organisation back.
Stage 3	Internally Supportive	The operations function starts to provide credible support for the organisation's business strategy. An operations strategy will be developed which will be derived from, and support, the business strategy. The organisation's operations are likely to be amongst the best in its industry.
Stage 4	Externally Supportive	The operations function provides the basis of competitive advantage for the organisation, by setting the standard in their industry. The operations function is likely to aim to be world class by seeking to emulate best practice wherever it is to be found. Operations will be seen as the means of exceeding customer expectations by delighting the customer. Operations will be managed proactively to drive the business strategy of the organisation.
