

Environmental Stripper

System	Universal PH7 Striper – All in one stripper for all applications and paint types- solvent, water based, silicone emulsions, and more
Substrates	All substrates except Plastics. Trials required for plastic types. Remove Paint on all INEX boards, concrete and brick substrates

Applications of our products are possible on all most substrates and the preparation and application are very consistent with minor technique variations for some proprietary products. The application hints below are designed to assist in creating safe and efficient result without unnecessary errors.

The product is non water based and has a smell to it. Due to its nature of composition, the product should not be inhaled. Though it is not dangerous as a pH 7 (neutral) and can be touched without concern, it must be treated with utmost care. Avoid eye contact, swallowing or inhaling at close range. Spraying of the product is strictly forbidden.

Protective gear must be worn in accordance with Standard site PPE and the list noted below:

- Overhauls are recommended but not compulsory.
- Safety helmet must be worn.
- Full eye wear.
- Full face mask; Drop down mask is acceptable.
- Gloves and boots are compulsory.

Application:

- Product is not required to be shaken or stirred.
- Apply on the surface to be stripped using brush or rollers. Where rollers are used be aware that plastic parts are likely to be penetrated and deformed with our product. Metals are fine for use.
- Product penetration is an indication that the product is working and is loosening the paint on the surface. Apply in quantities to match the thickness of the paint. Less for thin paint, more for old and thick paint.
- Being a very viscous liquid, it can spread 20m²/L. However the average is 5 where pH7 is required to penetrate the paint in proportional quantity to its number of coats and types being removed.
- Do not spray in any circumstance.
- Leave to stand for 1-5 minutes depending on the thickness and type of paint.
- Hose off with pressurized water-Gumie, etc. When applying water pressure, apply at an angle to avoid splash back on to applicator. Best at 45 degrees away from you and downwards.
- Water neutralizes the product and as such can go to waste.
- Do not use on plastics or composites without trials.
- If surfaces are to be painted again, the surface should be neutralized further with water. If left for too long, then other products will be required to penetrate and neutralize it.
