The High School Student's Guide to Writing a Great Research Paper Erika Eby, 2013 Presents a guide to writing a research paper covering such topics as finding sources taking research notes creating an outline writing the first draft and completing the final version *Logical Argument in the Research Paper* Russ Ward, 1997 Logical Argument in the Research Paper operates on the premise that collegiate level writing when cast in its most significant and sophisticated form is argumentative. Students are shown how writers examine a potential topic establish a stance upon that topic defend the stance avoid reasoning and ethical errors and in general say something meaningful about the topic. It also includes instruction about finding sources gathering information from them and correctly documenting them. However the emphasis remains on how effective writers evaluate sources think about the information they discover prepare a fair and informed argument rethink and revise the argument and finally present an argument in its completed form. Logical Argument in the Research Paper will help students learn some of the reasoning processes that all writers use when composing the academic argument.
