**Students at Risk of School Failure** José Jesús Gázquez, José Carlos Núñez, 2018-10-18 The main objective of this Research Topic is to determine the conditions that place students at risk of school failure identifying student and context variables In spite of the fact that there is currently little doubt about how one learns and how to teach in some countries of the developed world there is still there is a high rate of school failure Although the term school failure is a very complex construct insofar as its causes consequences and development from the field of educational psychology the construct student engagement has recently gained special interest in an attempt to deal with the serious problem of school failure School engagement builds on the anatomy of the students involvement in school and describes their feelings behaviors and thoughts about their school experiences So engagement is an important component of students school experience with a close relationship to achievement and school failure Children who self set academic goals attend school regularly and on time behave well in class complete their homework and study at home are likely to interact adequately with the school social and physical environments and perform well in school In contrast children who miss school are more likely to display disruptive behaviors in class miss homework frequently exhibit violent behaviors on the playground fail subjects be retained and if the behaviors persist quit school Moreover engagement should also be considered as an important school outcome eliciting more or less supportive reactions from educators For example children who display school engaged

behaviors are likely to receive motivational and instructional support from their teachers The opposite may also be true But what makes student engage more or less The relevant literature indicates that personal variables e g sensory motor neurodevelopmental cognitive motivational emotional behavior problems learning difficulties addictions social and or cultural variables e g negative family conditions child abuse cultural deprivation ethnic conditions immigration or school variables e g coexistence at school bullying cyberbullying may concurrently hinder engagement preventing the student from acquiring the learnings in the same conditions as the rest of the classmates Government Reports Annual Index ,1991 *Illinois Register* ,2009 New Techniques in Gastrointestinal Endoscopy Oliviu Pascu,Andrada Seicean,2011-10-03 As result of progress endoscopy has become more complex using more sophisticated devices and has claimed a special form In this moment the gastroenterologist performing endoscopy has to be an expert in macroscopic view of the lesions in the gut with good skills for using standard endoscopes with good experience in ultrasound for performing endoscopic ultrasound with pathology experience for confocal examination It is compulsory to get experience and to have patience and attention for the follow up of thousands of images transmitted during capsule endoscopy or to have knowledge in physics necessary for autofluorescence imaging endoscopy Therefore the idea of an endoscopist has changed Examinations mentioned need a special formation a superior level of instruction accessible to those who have already gained enough experience in basic diagnostic endoscopy This is the reason for what these new issues of endoscopy are presented in this book of New techniques in Gastrointestinal Endoscopy **The Fifth Pacific Rim International Conference on Advanced Materials and Processing, November 2-5, 2004, Beijing, China** Z.Y.
