

Multiple Choice Questions(Computer)

1. Which of the following is the product of data processing?
a. information b. data
c. software program d. system
2. The process of putting data into a storage location is called
a. reading b. writing
c. controlling d. hand shaking
3. The process of copying data from a memory location is called
a. reading b. writing
c. controlling d. booting
4. A list of instructions used by a computer is called
a. program b. CPU
c. text d. output
5. The CPU consists of
a. input, output and processing
b. control unit, primary storage and secondary storage
c. Control unit; arithmetic logic unit and primary storage
d. input, processing and storage
6. Which of the following is true about primary storage
a. it is a part of the CPU
b. It allows very fast access to data
c. It is relatively more expensive
d. all of the above
7. Which of the following is the most powerful type of the computer
a. main frame b. super conductor
c. micro computer d. super computer
8. Software instruction intended to satisfy a user's specific processing needs are called
a. system software b. process software
c. documentation d. application software
9. The computer device primarily used to provide hardcopy is the
a. CRT b. line printer
c. computer console d. card reader
10. Which one of the following can produce the final product of machine processing in a form usable by humans
a. storage b. control
c. input device d. output device
11. The term 'memory' applies to which one of the following
a. logic b. storage
c. input device d. output device
12. A program written in machine language is called _____ program.
a. object b. computer
c. assembler d. high level
13. A source program is the program written in _____ language.
a. English b. symbolic
c. high level d. object
14. A typical modern computer uses
a. magnetic cores for secondary storage
b. LSI chips
c. magnetic tape for primary memory
d. more than 10,000 vacuum tubes

a. byte b. record
c. word d. nibble
16. General purpose computers are those that can be adopted to countless uses simply by changing its
a. output device b. input device
c. processor d. program
17. The current generation of computers
a. second b. fifth
c. fourth d. third
18. The boolean expression $(A + \bar{C})(\bar{B} + \bar{C})$ simplifies to
a. $\bar{C} + A\bar{B}$ b. $\bar{C}(\bar{A} + B)$
c. $\bar{B}\bar{C} + \bar{A}$ d. None of these
19. To implement all functions of the basic logic functions, it needs
a. OR gate b. NOT gate
c. AND and NOT gates
d. None of these
20. In the binary number 110.101, the fractional part has the value
a. 0.625 b. 0.125
c. 0.875 d. 0.5
21. The value of binary 1111 is
a. $2^3 - 1$ b. 2^4
c. $2^4 - 1$ d. None of these
22. The value of 2^3 in octal system is
a. 20 b. 40
c. 400 d. None of these
23. A hexa decimal number 'A0' has the decimal value
a. 80 b. 256 c. 100 d. 160

Computer Science Illuminated Multiple Choice Questions

OECD

Computer Science Illuminated Multiple Choice Questions:

The Condition of Education, 1997 Includes a section called Program and plans which describes the Center's activities for the current fiscal year and the projected activities for the succeeding fiscal year **Emerging Trends in Computing, Informatics, Systems Sciences, and Engineering** Tarek Sobh, Khaled Elleithy, 2012-08-14 Emerging Trends in Computing Informatics Systems Sciences and Engineering includes a set of rigorously reviewed world class manuscripts addressing and detailing state of the art research projects in the areas of Industrial Electronics Technology Automation Telecommunications and Networking Systems Computing Sciences and Software Engineering Engineering Education Instructional Technology Assessment and E learning This book includes the proceedings of the International Joint Conferences on Computer Information and Systems Sciences and Engineering CISSE 2010 The proceedings are a set of rigorously reviewed world class manuscripts presenting the state of international practice in Innovative Algorithms and Techniques in Automation Industrial Electronics and Telecommunications **Handbook of Research on E-Assessment in Higher Education** Azevedo, Ana, Azevedo, José, 2018-09-14 E assessments of students profoundly influence their motivation and play a key role in the educational process Adapting assessment techniques to current technological advancements allows for effective pedagogical practices learning processes and student engagement The Handbook of Research on E Assessment in Higher Education provides emerging perspectives on the theoretical and practical aspects of digital assessment techniques and applications within educational settings Featuring coverage on a broad range of topics such as competency assessment adaptive courseware and learning performance this publication is ideally designed for educational administrators educational professionals teachers and professors researchers and graduate level students seeking current research on comparative studies and the pedagogical issues of online assessment in academic institutions Testing in American Schools United States. Congress. Office of Technology Assessment, 1992 And policy options Testing in transition Educational testing policy The changing federal role Lessons from the past A history of educational testing in the United States How other countries test Standardized tests in schools A primer Performance assessment Methods and characteristics Information technologies and testing Past present future List of acronyms Contractor reports Active Learning in College Science Joel J. Mintzes, Emily M. Walter, 2020-02-23 This book explores evidence based practice in college science teaching It is grounded in disciplinary education research by practicing scientists who have chosen to take Wieman's 2014 challenge seriously and to investigate claims about the efficacy of alternative strategies in college science teaching In editing this book we have chosen to showcase outstanding cases of exemplary practice supported by solid evidence and to include practitioners who offer models of teaching and learning that meet the high standards of the scientific disciplines Our intention is to let these distinguished scientists speak for themselves and to offer authentic guidance to those who seek models of excellence Our primary audience consists of the thousands of dedicated faculty and graduate students who teach undergraduate science at

community and technical colleges 4 year liberal arts institutions comprehensive regional campuses and flagship research universities In keeping with Wieman s challenge our primary focus has been on identifying classroom practices that encourage and support meaningful learning and conceptual understanding in the natural sciences The content is structured as follows after an Introduction based on Constructivist Learning Theory Section I the practices we explore are Eliciting Ideas and Encouraging Reflection Section II Using Clickers to Engage Students Section III Supporting Peer Interaction through Small Group Activities Section IV Restructuring Curriculum and Instruction Section V Rethinking the Physical Environment Section VI Enhancing Understanding with Technology Section VII and Assessing Understanding Section VIII The book s final section IX is devoted to Professional Issues facing college and university faculty who choose to adopt active learning in their courses The common feature underlying all of the strategies described in this book is their emphasis on actively engaging students who seek to make sense of natural objects and events Many of the strategies we highlight emerge from a constructivist view of learning that has gained widespread acceptance in recent years In this view learners make sense of the world by forging connections between new ideas and those that are part of their existing knowledge base For most students that knowledge base is riddled with a host of na ve notions misconceptions and alternative conceptions they have acquired throughout their lives To a considerable extent the job of the teacher is to coax out these ideas to help students understand how their ideas differ from the scientifically accepted view to assist as students restructure and reconcile their newly acquired knowledge and to provide opportunities for students to evaluate what they have learned and apply it in novel circumstances Clearly this prescription demands far more than most college and university scientists have been prepared for
