1. A crate filled with delicious junk food rests on a horizontal floor. Only gravity and the support force of the floor act on it, as shown by the vectors for weight W and normal force n .

- a. The net force on the crate is (zero) (greater than zero).
b. Evidence for this is no acceleration.

2. A slight pull P is exerted on the crate, not enough to move it.

- a. The force of friction f acting on the crate is (less than) (equal to) (greater than) P .
b. The net force on the crate is (zero) (greater than zero).

3. Pull P is increased until the crate begins to move. It is pulled so that it moves with constant velocity across the floor.

- a. Friction f is (less than) (equal to) (greater than) P .
b. Constant velocity means acceleration is (zero) (greater than zero).
c. The net force on the crate is (less than) (equal to) (greater than) zero.

4. Pull P is further increased and is now greater than friction f .

- a. The net force on the crate is (less than) (equal to) (greater than) zero.
b. The net force acts toward the right, so acceleration acts toward the (left) (right).

5. If the pulling force P is 150 N and the crate doesn't move, what is the magnitude of f ? 150 N
6. If the pulling force P is 200 N and the crate doesn't move, what is the magnitude of f ? 200 N
7. If the force of sliding friction is 250 N, what force is necessary to keep the crate sliding at constant velocity? 250 N
8. If the mass of the crate is 50 kg and sliding friction is 250 N, what is the acceleration of the crate when the pulling force is 250 N? 0 m/s² 300 N? 1 m/s² 500 N? 5 m/s²

Conceptual Electromagnetism Branislav M. Notarosh, 2017-07-06 This is a textbook on electromagnetic fields and waves completely based on conceptual understanding of electromagnetism The text provides operational knowledge and firm grasp of electromagnetic fundamentals aimed toward practical engineering applications by combining fundamental theory and a unique and comprehensive collection of as many as 888 conceptual questions and problems in electromagnetism Conceptual questions are designed to strongly enforce and enhance both the theoretical concepts and understanding and problem solving techniques and skills in electromagnetism

SURVEY OF RESEARCHES IN EDUCATION Prof. Sunil Kumar Singh, 2020-03-01 Education is a positive construct which empowers people to make use of its potentialities in the best ways to achieve excellence Research in this endeavour tries to resolve various problems related to education educational process and educational advancements Thereby keeping education updated and advanced in turn preparing updated positive and constructive citizens of the society Today an educated person is expected to be equipped with the most advanced knowledge skills humane values and digitalisation including evaluation of existing policies and bringing out components variables to be covered by forthcoming policies Thus research is positively correlated with the human and material development ensuring humane and developed society The strength of an institution is reflected by the researches undertaken by the members over there It gives me immense pleasure to note that survey of research abstracts in Faculty of Education Banaras Hindu University has been completed and ready for its publication in hard and soft mode The present volume includes 256 abstracts since 1952 including most recent D Litt abstract in education This survey no doubt presents a trend of researches understudy These abstracts will certainly pave educational paths to solving recent educational issues A commendable contribution has been done by the team of publication This will have a long term impact on future researchers Moreover preservation of research knowledge covering 33 identified educational areas and its dissemination were much needed and expected for the cause of quality research I am sure the volume will serve its qualitative purpose to researchers teachers administrators and policy makers in India and abroad We are grateful to Prof D P Singh Chairman University Grants Commission New Delhi India for writing foreword for this volume and motivating us I convey my heartfelt gratitude to all the members of publication team for their concerted efforts in bringing out this precious volume Date 13th April 2020 Prof R P Shukla Banaras Hindu University Head and Dean Varanasi 10 Faculty of Education

Conceptual Physics Problem Solving Exercises in Physics Se Jennifer Bond Hickman, 1998-04-03

University Physics: Australian edition Hugh D Young, Roger A Freedman, Ragbir Bhathal, 2010-08-04 This book is the product of more than half a century of leadership and innovation in physics education When the first edition of *University Physics* by Francis W Sears and Mark W Zemansky was published in 1949 it was revolutionary among calculus based physics textbooks in its emphasis on the fundamental principles of physics and how to apply them The success of *University Physics* with generations of several million students and educators around the world is

a testament to the merits of this approach and to the many innovations it has introduced subsequently In preparing this First Australian SI edition our aim was to create a text that is the future of Physics Education in Australia We have further enhanced and developed University Physics to assimilate the best ideas from education research with enhanced problem solving instruction pioneering visual and conceptual pedagogy the first systematically enhanced problems and the most pedagogically proven and widely used online homework and tutorial system in the world Mastering Physics

Starlight Starbright: Are Stars Conscious? Second Edition Greg Matloff, C. Bangs, 2020-05-07

The only thing we can be absolutely sure of is our own consciousness But what is consciousness Is it a property that is unique to humans or do we share it with other lifeforms Or is the philosophical doctrine of panpsychism correct are stars and the entire universe conscious in some sense Early chapters in this book examine the prehistory mythology and history of this topic Arguments are presented from the viewpoints of shamans philosophers poets quantum physicists and novelists A simple toy model of panpsychism is then presented in which a universal field of proto consciousness interacts with molecular bonds via the vacuum fluctuation pressure of the Casimir Effect It is shown how this model is in congruence with an anomaly in stellar

motions called Parnago's Discontinuity. Cool redder less massive stars such as the Sun apparently circle the center of the galaxy faster than their hotter bluer more massive sisters. This discontinuity occurs at the point in the stellar distribution where molecules begin to appear in stellar spectra. As described in the first edition of this book, observations of main sequence stars out to 260 light years and giant stars out to 1 000 light years using the ESA Hipparcos space observatory support the reality and non locality of Parnago's Discontinuity. Local more conventional explanations for this phenomenon are not supported by observations of other galaxies and the spiral arms of the Milky Way. Since 2014 the new ESA Gaia space observatory has been obtaining kinematics and position data for 1 billion stars in our galaxy. The first Gaia data release in 2016 has been used in 2018 by a Russian team to demonstrate Parnago's Discontinuity for a large stellar sample out to 500 light years from the Sun. These observations support the hypothesis that anomalous stellar motion is due to stellar volition as described by philosopher author Olaf Stapledon in his classic novel *Star Maker* as previously discussed by the author in the peer reviewed *Journal of the British Interplanetary Society (JBIS)*. In light of the new Gaia observations and work by other researchers it is not impossible that panpsychism is emerging from the realm of philosophy as a new subdivision of observational astronomy. Simple models of universal proto consciousness may be subject to inductive tests using current and future space observatories. A special feature of this book is the chapter frontispiece art by C Bangs.

Conceptual Physical Science Paul G. Hewitt, John Suchocki, Leslie A. Hewitt, 2004 *Conceptual Physical Science* Third Edition takes learning physical science to a new level by combining Hewitt's leading conceptual approach and friendly writing style in a new edition that provides stronger integration of the sciences more quantitative coverage and a wealth of new media resources to help professors in class and students out of class. The book's consistent high quality coverage includes five new chapters on chemistry astronomy and earth science for an even more balanced approach to physical science. New Looking Forward and Looking Back boxes connect themes and concepts throughout the book helping students see the big picture. More computational coverage eg Figuring Physical Science in chapter calculation allows students to practice the quantitative skills they need to master the concepts of physical science and be able to apply their knowledge. Looking Forward and Looking Back boxes in every chapter connect themes and
