Description of the test and the factors, variables, characteristics, traits measured:

>This 75 minute tests contains the following sections :

>Programmer Aptitude Test measures your aptitude and potentials for programming profession. You are evaluated for your logical ability and skills to interpret specifications and documentations. Your level of logical skills, precision and reasoning determines your scores in programmer aptitude battery.

Skills Required

This aptitude test does not require you to be a master programmer but you need to have strong aptitude to handle programming job. A programmer aptitude battery measures:

- Your skill to interpret intricate specifications.
- Your logical ability to remove bottlenecks in the programming process.
- Your skill to focus your attention on minute details. Sometimes, ignoring a single symbol can result in destruction of a whole program.
- How much accurate you are? It is nothing more than a skill to learn to be accurate. Accuracy is important for programming of a professional application.
- Can you solve problems very quickly? You are often required to reason with symbols.

Main Areas

Attention To details

This area of the test offers you some complex expression. You are required to simplify the expression by applying the given rules. You can't do it without focusing your attention to the details.

Logical Ability

How do you solve the problems? You are offered questions which require you to follow some kind of logic. You have to display your understanding of the problem graphically. When you have deep desire for computer programming, you can't fail in this area.

Flowchart Logics

This section of Programmer aptitude test measures your ability to follow flowchart logic. Your concepts about simple looping are also tested. The programmers have, generally, to deal with long procedures where single keyboard can change the whole application. The flow charts help you to understand procedural logic behind the programs. If you can't understand simple illustrations then programming procedures would be far from your understandings. When you are capable to grasp basic concepts behind a flow chart will you tend to be a computer programmer.

Working according to specific instructions

These problems of programmer aptitude test gauge your ability to work according to the given specifications and, subsequently, to apply the correct solution. For example some alphabetic lists are given and are to be sorted according to some specific instructions. The data sorting is an important job in any database developing agency.
