Supported by the Bosch-designed Dinion digital imaging technology, they provide a proven, dependable solution for any security and surveillance requirements, day and night.

Functions

720p HD Cameras

The FlexiDomeHD is designed using the latest HD CCD sensor which can deliver high resolution 720p streaming video in HD format (16:9). The camera now brings the unmatched Dinion Image performance to HD standard video.

Superior image quality

With a 1/3-inch HD CCD sensor and Bosch's advanced digital signal processing, the FlexiDomeHD provides outstanding image quality for a wide range of security applications.

Digital Image Processing

The highly accurate digital signal processing optimally processes the image to bring out the details in the scene making it suitable for applications requiring identification of facial characteristics or alphanumeric characters.

XF-Dynamic and SmartBLC

The XF-Dynamic technology uses pixel-by-pixel analysis to provide the user with the most detailed information. Turn on SmartBLC to automatically compensate the image without the need for complicated set-up or without compromising dynamic range. Features such as Autoblack and Sharpness further improve the details in a scene.

Programmable Modes

Six independent, pre-programmed configuration modes, which have been optimized for typical applications, makes camera programming on-site easy and user-friendly. The installer just needs to select a mode from the menu that best defines the environment in which the camera is being installed. However, the operator still has the ability to customize these modes, if necessary, for the specific requirements of the site.
