Evidence-based research throughout the text helps you develop clinical decision-making skills. Logically organized content is presented in three parts to correspond with typical patient problems and clinical decision-making. Case studies present real-life scenarios that demonstrate how key concepts apply to clinical decision-making and evidence-based practice. World Health Organization disablement model ICF is incorporated to help you learn how to match a patient's limitations with the best clinical treatment. Multidisciplinary approach in a variety of settings demonstrates how physical therapists can work with the rest of the healthcare team to provide high-quality care in orthotic/prosthetic rehabilitation. Modern equipment and technology are featured throughout the text, presenting the latest options in prosthetics and orthotics rehabilitation. Authoritative information from the Guide to Physical Therapist Practice, Second Edition, is incorporated throughout. A wealth of tables and boxes highlight vital information for quick reference and ease of use.

Seating and Wheeled Mobility Michelle L.

Lange, Jean L. Minkel, 2024-12-30 Fully updated and expanded in its second edition, *Seating and Wheeled Mobility: A Clinical Resource Guide* presents clinical assessment considerations when working with a person with a mobility disability. The book provides a wide spectrum of information, from foundational information for those practitioners who are new to the field to in-depth, population-specific information for practitioners who perhaps have not worked with a particular population in the past. The book is divided into sections, each addressing a different area of clinical practice in wheelchair seating and mobility. The first section is an in-depth presentation of the assessment process and pressure management. The range of available seating supports is presented as part of the product selection process, including matching the person's needs with available technology. The second section focuses on 24-hour postural care. Three types of seating are presented: hands-free, hands-dependent, and prop-seaters. Included is the most current method to measure and describe the seated person and related support surfaces needed when recommending a device. The third section lays the foundation for clinical decision-making around the selection and fit of the most appropriate wheeled mobility device: manual power wheelchair or scooter. The fourth section provides in-depth clinical applications for each mobility category: On-time mobility for the very young.

power seating and mobility skills training are addressed The fifth section provides population specific clinical application of position pressure management and mobility for the pediatric geriatric and bariatric populations as well as persons with both degenerative and complex neuromuscular impairments The sixth section presents additional considerations when working with persons who are aging with a disability considerations of the environment of use safe transport of a wheelchair and the application of wheelchair standards in the clinic Finally measuring outcomes throughout the service provision process and a look at the past present and future of complex rehab technology is included Richly illustrated throughout this book has been carefully designed to support occupational and physical therapists suppliers distributors and funders payers who are interested in wheelchair seating and mobility assessment and applications *Journal of Rehabilitation R & D* ,2007
