Science: What's in it for the Learner? Deborah Corrigan, Cathy Bunting, Justin Dillon, Alister Jones, Richard Gunstone, 2015-09-01 This volume considers the future of science learning what is being learned and how it is being learned in formal and informal contexts for science education To do this the book explores major contemporary shifts in the forms of science that could or should be learned in the next 20 years what forms of learning of that science should occur and how that learning happens including from the perspective of learners In particular this volume addresses shifts in the forms of science that are researched and taught post school emerging sciences new sciences that are new integrations futures science and increases in the complexity and multidisciplinary of science including a multidisciplinary that embraces ways of knowing beyond science A central aspect of this in terms of the future of learning science is the urgent need to engage students including their non cognitive affective dimensions both for an educated citizenry and for a productive response to the ubiquitous concerns about future demand for science based professionals Another central issue is the actual impact of ICT on science learning and teaching including shifts in how students use mobile technology to learn science Materiality and

Organizing Paul M. Leonardi, Bonnie A. Nardi, Jannis Kallinikos, 2012-11-22 Ask a person on the street whether new technologies bring about important social change and you are likely to hear a resounding yes But the answer is less definitive amongst academics who study technology and social practice Scholarly writing has been heavily influenced by the ideology of technological determinism the belief that some types or technologically driven social changes are inevitable and cannot be stopped Rather than argue for or against notions of determinism the authors in this book ask how the materiality the arrangement of physical digital or rhetorical materials into particular forms that endure across differences in place and time of technologies ranging from computer simulation tools and social media to ranking devices and rumours is actually implicated in the process of formal and informal organizing The book builds a new theoretical framework to consider the important socio technical changes confronting people s everyday experiences in and outside of work Leading scholars in the field contribute original chapters examining the complex interactions between technology and the social between artefact and humans The discussion spans multiple disciplines including management information systems informatics communication sociology and the history of technology and opens up a new area of research regarding the relationship between materiality and organizing **EBOOK: Analysing Exemplary Science Teaching** Steve Alsop, Larry

Bencze, Erminia Pedretti, 2004-12-16 I read lots of books in which science education researchers tell science teachers how to teach This book refreshingly is written the other way round We read a number of accounts by outstanding science and technology teachers of how they use new approaches to teaching to motivate their students and maximise their learning These accounts are then followed by some excellent analyses from leading academics I learnt a lot from reading this book Professor Michael Reiss Institute of Education University of London Provides an important new twist on one of the enduring

problems of case based learning This is a book that deserves careful reading and re reading threading back and forwards from the immediate and practical images of excellence in the teachers cases to the comprehensive and scholarly analyses in the researchers thematic chapters Professor William Loudon Edith Cowan University Australia Through a celebration of teaching and research this book explores exemplary practice in science education and fuses educational theory and classroom practice in unique ways *Analysing Exemplary Science Teaching* brings together twelve academics ten innovative teachers and three exceptional students in a conversation about teaching and learning Teachers and students describe some of their most noteworthy classroom practice whilst scholars of international standing use educational theory to discuss define and analyse the documented classroom practice Classroom experiences are directly linked with theory by a series of annotated comments This distinctive web like structure enables the reader to actively move between practice and theory reading about classroom innovation and then theorizing about the basis and potential of this teaching approach Providing an international perspective the special lessons described and analysed are drawn from middle and secondary schools in the UK Canada and Australia This book is an invaluable resource for preservice and inservice teacher education as well as for graduate studies It is of interest to a broad spectrum of individuals including training teachers teachers researchers administrators and curriculum coordinators in science and technology education [Cumulated Index Medicus](#), 1997 **Boston Studies in the Philosophy of Science** Peter Plaass, 1994 [Forthcoming Books](#) Rose Arny, 1992-10
