about using your Instant Pot for the first time If you re not inclined to read the manual that came with your Instant Pot I ve written a couple of easy to follow guides for new users It ll get you comfortable with using the Instant Pot for the first time It shows you the basics and will walk you through the water test which is the first thing you should do Recent Instant Pot users seem to be getting the Burn message more frequently If you re using an online recipe it may have been made in an older 6 quart Instant Pot Because of design changes your Instant Pot may not work exactly the same way Here are two steps you can take Add any tomato product and or starchy ingredients rice pasta etc at the end and DON T stir Just push down with a large spoon or spatula to submerge in liquid Increase the quantity of liquid called for in the recipe If your ring cannot be rotated around the sealing ring rack it s not properly seated You should be able to turn it in place with a bit of effort If your sealing ring hasn t been installed correctly you may find that steam is leaking out of the sides of the lid According to the Instant Pot manual the Instant Pot requires at least 1 cup of liquid I ve used as little as 1 2 cup and done fine with many recipes Some liquids like canned tomato sauce are too dense and require thinning out with broth or water When you cook foods like pasta or other messy foods the anti block shield and the float valve can get dirty and be obstructed Are you seeing an Instant Pot burn message It s a common problem that many Instant Pot users come across Find out why you re getting the Instant Pot burn error message how to avoid the problem in the future and how to recover from a burn error and salvage your meal
