policymakers and teachers seeking coverage on academic leadership and leadership models **KI 2008: Advances in Artificial Intelligence** Andreas Dengel, Karsten Berns, Thomas Breuel, Frank Bomarius, Thomas R.

Roth-Berghofer, 2008-09-24 KI 2008 was the 31st Annual German Conference on Artificial Intelligence held September 23-26 at the University of Kaiserslautern and the German Research Center for Artificial Intelligence DFKI GmbH in Kaiserslautern Germany. The conference series started in 1975 with the German Workshop on AI (GWA) which took place in Bonn and represents the first forum of its type for the German AI Community. Over the years AI has become a major field in computer science in Germany involving a number of successful projects that received much international attention. Today KI conferences are international forums where participants from academia and industry from all over the world meet to exchange their recent research results and to discuss trends in the field. Since 1993 the meeting has been called the Annual German Conference on Artificial Intelligence designated by the German acronym KI. This volume contains the papers selected out of 77 submissions including a number of submissions from outside German speaking countries. In total 15 submissions (19%) were accepted for oral and 30 (39%) for poster presentation. Oral presentations at the conference were in a single track. Because of this the choice of presentation form (oral or poster) was based on how well reviews indicated that the paper would fit into one or the other format. The proceedings allocate the same space to both types of papers. In addition we selected six papers that show high application potential describing systems or prototypical implementations of innovative AI technologies. They are also included in this volume as two-page extended abstracts. Leading with AI and Analytics: Build Your Data Science IQ to Drive Business Value Eric Anderson, Florian Zettelmeyer, 2020-11-23

Lead your organization to become evidence-driven. Data is the benchmark that informs corporate projections, decision making, and analysis. But why do many organizations that see themselves as data-driven fail to thrive? In Leading with AI and Analytics, two renowned experts from the Kellogg School of Management show business leaders how to transform their organization to become evidence-driven, which leads to real measurable changes that can help propel their companies to the top of their industries. The availability of unprecedented technology-enabled tools has made AI (Artificial Intelligence) an essential component of business analytics. But what's often lacking are the leadership skills to integrate these technologies to achieve maximum value. Here the authors provide a comprehensive game plan for developing that all-important human factor to get at the heart of data science: the ability to apply analytical thinking to real-world problems. Each of these tools and techniques comes to powerful life through a wealth of powerful case studies and real-world success stories. Inside you'll find the essential tools to help you develop a strong data science intuition quotient. Lead and scale AI and analytics throughout your organization. Move from best-guess decision making to evidence-based decisions. Craft strategies and tactics to create real impact. Written for anyone in a leadership or management role from C-level unit team managers to rising talent, this powerful hands-on guide meets today's growing need for real-world tools to lead and succeed with data.
